</table>
Roundtables with Coffee  
7:00 a.m.–8:15 a.m.

348  
Section on Bayesian Statistical Science Roundtable with Coffee (fee event)  
Section on Bayesian Statistical Science  
Organizer(s): Merlise Clyde, Duke University  
WL01  
Model Selection in Hierarchical Models—❖ David B. Dunson, National Institute of Environmental Health Sciences

349  
Section on Statistical Education Roundtable with Coffee (fee event)  
Section on Statistical Education  
Organizer(s): Patti Collings, Brigham Young University  
WL02  
An Open Discussion about Quantitative and Qualitative Research in Statistics Education—❖ Jackie Miller, The Ohio State University

350  
Section on Statistics and the Environment Roundtables with Coffee (fee event)  
Section on Statistics and the Environment  
Organizer(s): Peter Guttorp, University of Washington  
WL03  
Keeping Our Jobs: Relevance of Statistical Research in a Production Environment—❖ Gretchen Moisen, U.S. Forest Service  
WL04  
Current Issues in Space-Time Modeling of Environmental Data—❖ Montserrat Fuentes, North Carolina State University

351  
Section on Statistics in Epidemiology Roundtable with Coffee (fee event)  
Section on Statistics in Epidemiology, Section on Statistical Consulting  
Organizer(s): Jennifer Clark Nelson, Group Health Cooperative  
WL05  
Developing and Cultivating Successful Collaborations—❖ Robert F. Woolson, Medical University of South Carolina

352  
Section on Physical and Engineering Sciences Roundtable with Coffee (fee event)  
Section on Physical and Engineering Sciences  
Organizer(s): Winson Taam, The Boeing Company  
WL06  
Catching up on Wavelets: Recent Advances, Future Directions—❖ Donald B. Percival, University of Washington

353  
Statistical Society of Canada Roundtable with Coffee (fee event)  
SSC, Section on Statistical Consulting  
Organizer(s): X. Joan Hu, Simon Fraser University  
WL07  
Tips for Academic Medical Statisticians—❖ Karen Kopciuk, Alberta Cancer Board; Rhonda Rosychuk, University of Alberta

Special Presentation 8:30 a.m.–10:20 a.m.

354  
Late-Breaking Session #2: What Is the Role of Statistics in Public Policy Debates about Climate Change?—Other  
The ASA, ENAR, IMS, SSC, WNAR  
Organizer(s): Edward Wegman, George Mason University; Richard L. Smith, The University of North Carolina at Chapel Hill  
Chair(s): Douglas W. Nychka, National Center for Atmospheric Research  
8:40 a.m.  
The Kyoto Accord, the 2001 IPCC Third Assessment Report, and the Academic Papers Underpinning Them—❖ Edward Wegman, George Mason University

9:05 a.m.  

9:30 a.m.  

9:55 a.m.  
Floor Discussion
### Wednesday

#### 355  
**Introductory Overview Lectures: Image Statistics and Bootstrap—Other**  
The ASA, ENAR, IMS, SSC, WNAR  
Organizer(s): Jianwen Cai, The University of North Carolina at Chapel Hill  
Chair(s): Chris Fraley, Insightful Corporation  
8:35 a.m.  **Introduction to Bootstrapping** — Tim C. Hesterberg, Insightful Corporation  
9:25 a.m.  **Image Statistics** — Eugene Demidenko, Dartmouth Medical School  
10:15 a.m.  **Floor Discussion**

#### 356  
**Estimation and Inference for Models with Many Parameters—Invited**  
Business and Economics Statistics Section  
Organizer(s): Robert J. Kohn, University of New South Wales  
Chair(s): Thomas S. Shively, The University of Texas at Austin  
8:35 a.m.  **Objective Bayesian Analysis for Multivariate Dynamic Models** — Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia; Shawn Ni, University of Missouri-Columbia  
9:00 a.m.  **Bayesian Inference for Gaussian Copula Models** — Robert J. Kohn, University of New South Wales  
9:25 a.m.  **Spatial Bayesian Variable Selection with Application to Functional Magnetic Resonance Imaging** — Michael Smith, University of Sydney; Daniel Smith, University of Sydney  
9:50 a.m.  **Statistical Inference for Highly Parameterized Models for Discrete-Valued Data** — Sylvia Frühwirth-Schnatter, Johannes Kepler University  
10:15 a.m.  **Floor Discussion**

#### 357  
**Statistical Models in Computational Biology—Invited**  
WNAR, Biometrics Section, ENAR  
Organizer(s): Raquel Prado, University of California, Santa Cruz  
Chair(s): Daniel Merl, University of California, Santa Cruz  
8:35 a.m.  **Spatial Smoothing To Map HIV Recombination Hotspots: Associations with RNA Secondary Structure** — Marc A. Suchard, University of California, Los Angeles; Vladimir N. Minin, University of California, Los Angeles; Karin S. Dorman, Iowa State University  
8:55 a.m.  **Computational and Statistical Algorithms for Parentage Inference with Single Nucleotide Polymorphisms** — Eric C. Anderson, Southwest Fisheries Science Center  
9:15 a.m.  **Detecting Positive Selection in Protein-Coding DNA Sequences in Absence of Substantial Phylogenetic Information** — Raquel Prado, University of California, Santa Cruz; Daniel Merl, University of California, Santa Cruz  
9:35 a.m.  **Inferring Maximum-Likelihood Species Phylogenies under Coalescence** — Laura S. Kubatko, University of New Mexico  
9:55 a.m.  **A Bayesian Approach to Gene Tree Concordance** — Bret Larget, University of Wisconsin-Madison  
10:15 a.m.  **Floor Discussion**

#### 358  
**Complex Sampling Designs and Related Inference Issues in Epidemiologic Studies—Invited**  
Section on Statistics in Epidemiology  
Organizer(s): Bhramar Mukherjee, University of Florida  
Chair(s): Malay Ghosh, University of Florida  
8:35 a.m.  **Complex Case-Control Sampling Methods: Solutions to Some Diverse Problems in Epidemiological Research** — Bryan Langholz, Keck School of Medicine of USC  
9:00 a.m.  **Confounding of Genetic Association Studies by Population Structure** — Alice S. Whittemore, Stanford University  
9:25 a.m.  **Case-Control Studies of Gene-Environment Interaction: a Bayesian Approach** — Bhramar Mukherjee, University of Florida; Li Zhang, University of Florida; Malay Ghosh, University of Florida  
9:50 a.m.  **Disc** — Peter Kraft, Harvard University  
10:10 a.m.  **Floor Discussion**
### GENERAL PROGRAM SCHEDULE

**359**

#### Rare Trait Inference—Invited

**Section on Survey Research Methods**

**Organizer(s):** Myron J. Katzoff, National Center for Health Statistics  
**Chair(s):** Myron J. Katzoff, National Center for Health Statistics

**8:35 a.m.** Network Sampling: a Potential Tool for Survey Estimates about Rare Populations—❖Iris M. Shimizu, National Center for Health Statistics; Monroe G. Sirken, National Center for Health Statistics

**9:00 a.m.** Design and Likelihood-Based Inference for Sample Surveys on Rare Traits—❖Steve Thompson, Simon Fraser University

**9:25 a.m.** Testing Logistic Regression Coefficients with Clustered Data and Few Positive Outcomes—❖Sally Hunsberger, National Cancer Institute; Barry I. Graubard, National Cancer Institute; Edward Korn, National Cancer Institute

**9:50 a.m.** Analytic Issues for Rare Events in the NHANES Survey—❖Lester R. Curtin, Centers for Disease Control and Prevention

**10:15 a.m.** Floor Discussion

### CC-602

### 361

#### Causal Inference and the Estimation of Neighborhood Health Effects—Invited

**Section on Health Policy Statistics, Biometrics Section**

**Organizer(s):** Bob Gerzoff, Centers for Disease Control and Prevention  
**Chair(s):** Bob Gerzoff, Centers for Disease Control and Prevention

**8:35 a.m.** The (Mis)estimation of Neighborhood Effects: Identification Problems and the Multilevel Model—❖J. Michael Oakes, University of Minnesota

**9:00 a.m.** Response to ‘The (Mis)estimation of Neighborhood Effects’—❖Jay S. Kaufman, The University of North Carolina at Chapel Hill

**9:25 a.m.** Forming Better Guesses about Neighborhood Effects on Health—❖Brian Krauth, Simon Fraser University

**9:50 a.m.** Causal Diagrams To Express Identification of Place Effects Using Multilevel Models—❖M. Maria Glymour, Harvard School of Public Health; S. V. Subramanian, Harvard School of Public Health

**10:15 a.m.** Floor Discussion

### CC-607

### 360

#### New Directions in Statistical Machine Learning—Invited

**Section on Statistical Computing, Section on Statisticians in Defense and National Security, Section on Nonparametric Statistics**

**Organizer(s):** Yufeng Liu, The University of North Carolina at Chapel Hill  
**Chair(s):** Yufeng Liu, The University of North Carolina at Chapel Hill

**8:35 a.m.** Margin-Based, Semisupervised Learning—Junhui Wang, University of Minnesota; ❖Xiaotong Shen, University of Minnesota

**9:05 a.m.** Classification and Feature Selection for High-Dimensional Data—❖Hao Zhang, North Carolina State University

**9:35 a.m.** Bias and Variance of Bagging Based on Subsampling with and without Replacement—❖Andreas Buja, University of Pennsylvania

**10:05 a.m.** Floor Discussion

### CC-612

### 362

#### Detecting Anomalies in Dynamic Multivariate Data—Invited

**Section on Statisticians in Defense and National Security, Section on Physical and Engineering Sciences, Section on Statistical Graphics**

**Organizer(s):** Deepak K. Agarwal, AT&T Labs-Research  
**Chair(s):** Chuanhai Liu, Purdue University

**8:35 a.m.** Aggregation Queries at Streaming Speeds—❖Divesh Srivastava, AT&T Labs-Research

**9:00 a.m.** Dynamic Thresholds: Monitoring Streams of Counts Online—❖Diane Lambert, Google, Inc.; Chuanhai Liu, Purdue University

**9:50 a.m.** Two-Dimensional Variable Window Scan Statistics—❖Joseph Glaz, University of Connecticut

**10:15 a.m.** Floor Discussion
Success is on the horizon with SAS® Publishing and SAS® Education!

We all aspire to advance in our careers. In this rapidly changing and competitive job market, you need to distinguish yourself. Come visit us at booths #206 and #207 to ask us how!

SAS Publishing

Build your SAS skills  SAS Learning Edition is your personal learning version of the world’s leading business intelligence and analytic software. Gain hands-on experience and learn how SAS gives you the power to perform with this inexpensive, comprehensive and easy-to-use software.

support.sas.com/le

Expand your knowledge  SAS Press books deliver expert, real-world advice for all skill levels covering such topics as SAS applications and examples, programming tips and techniques, statistical analysis and industry-specific titles.

support.sas.com/saspress

Think outside the classroom  Learn at your own pace and convenience with SAS Self-Paced e-Learning’s interactive training. You select the training that is right for you from an array of lessons, courses and libraries—when and where you need it.

support.sas.com/selfpaced

SAS Higher Education Consulting

Incorporate SAS Technology into your academic programs  Supporting SAS’ commitment to improve and expand educational opportunities, SAS Higher Education Consulting offers a full range of programs and services. Let SAS help you develop the program that best meets the needs of your institution.

www.sas.com/heconsulting

SAS Certified Professional Program

Advance your career  SAS is committed to helping you discover the professional advantages of becoming SAS Certified. Put your SAS skills to the test today and reap the benefits tomorrow!

support.sas.com/certification
363  
**Design and Analysis of Experiments for Complex Computer Simulators —Invited**

Section on Physical and Engineering Sciences  
Organizer(s): Derek Bingham, Simon Fraser University  
Chair(s): Derek Bingham, Simon Fraser University

8:35 a.m.  
**Designs for Integrated Computer and Physical Experiments**  
❖ C. Shane Reese, Brigham Young University; Derek Bingham, Simon Fraser University; Wilson Lu, Simon Fraser University

9:05 a.m.  
**Sequential Experiment Design for Contour Estimation from Complex Computer Codes**  
❖ Pritam Ranjan, Simon Fraser University

9:35 a.m.  
**Uncertainty Quantification for Combining Experimental Data and Computer Simulations from Multiple Data Sources**  
❖ Brian J. Williams, Los Alamos National Laboratory; Dave Higdon, Los Alamos National Laboratory; Jim Gattiker, Los Alamos National Laboratory

10:05 a.m.  
**Floor Discussion**

**Invited Panels 8:30 a.m.–10:20 a.m.**

364  
**Status of Disability Information in Surveys—Invited**

Committee on Statistics and Disability  
Organizer(s): Michele Connolly, U.S. Social Security Administration  
Chair(s): Michele Connolly, U.S. Social Security Administration

Panelists:  
❖ Susan Schechter, Office of Management and Budget  
❖ Jennifer Madans, National Center for Health Statistics  
❖ Martin Gould, National Council for Disability  
❖ Philip Rones, Bureau of Labor Statistics  
❖ Mary Grace Kovar, National Opinion Research Center

10:15 a.m.  
**Floor Discussion**

365  
**National Science Foundation Invited Session—Invited**

National Science Foundation, Section on Statistical Education  
Organizer(s): Grace Yang, National Science Foundation  
Chair(s): Grace Yang, National Science Foundation

Panelists:  
❖ Cheryl Eavey, National Science Foundation  
❖ Dean Evasius, National Science Foundation  
❖ Wen C. Masters, National Science Foundation  
❖ Ronald S. Fecso, National Science Foundation

10:15 a.m.  
**Floor Discussion**

**Topic-Contributed Sessions 8:30 a.m.–10:20 a.m.**

366  
**Sparse Inference and Multiple Comparisons—Topic-Contributed**

IMS  
Organizer(s): Jiashun Jin, Purdue University  
Chair(s): Pei Wang, Fred Hutchinson Cancer Research Center

8:35 a.m.  
**False Discovery Rates for Spatial Signals**  
❖ Ruth Heller, Tel-Aviv University; Yoav Benjamini, Tel-Aviv University

8:55 a.m.  
**Large Dimensional Covariance Matrix Estimation Using a Factor Model**  
❖ Jinchi Lv, Princeton University

9:15 a.m.  
**A Bayesian Approach for Incomplete Paired Data**  
❖ Feng Liang, Duke University; Woncheol Jang, Duke University; Fei Liu, Duke University

9:35 a.m.  
**Quantile Coupling for Median and Its Application to Nonparametric Robust Estimation**  
❖ Harrison Zhou, Yale University

9:55 a.m.  
**Sparse Principal Component Analysis**  
❖ Hui Zou, University of Minnesota

10:15 a.m.  
**Floor Discussion**

367  
**Adaptive Dose Response—Topic-Contributed**

Biopharmaceutical Section, Biometrics Section, ENAR  
Organizer(s): Jose Pinheiro, Novartis Pharmaceuticals Corporation  
Chair(s): Jeffrey Maca, Novartis Pharmaceuticals Corporation

8:35 a.m.  
**Implementing Bayesian Adaptive Dose-Response Finding Studies: a Clinical Perspective**  
❖ Michael Krams

8:55 a.m.  
**Adaptive Dose-Response Phase II Trials for Clinical Development**  
❖ Qing Liu, Johnson & Johnson

9:15 a.m.  
**Evaluating Rolling Dose Designs and Methods**  
❖ Amit Roy, Bristol-Myers Squibb Company; Frank Shen, Bristol-Myers Squibb Company

◊ Medical Expenditures: Data Collection, Estimation, and Evaluations—Topic-Contributed
Section on Survey Research Methods, Section on Health Policy Statistics, Biometrics Section, ENAR
Organizer(s): Trena Ezzati-Rice, Agency for Healthcare Research and Quality
Chair(s): Steven B. Cohen, Agency for Healthcare Research and Quality

8:35 a.m. Evaluation of the Completeness of Household Reports of Medical Expenditures for Visits to Physician Offices—Steven R. Machlin, Agency for Healthcare Research and Quality; ◊ Diana Wobus, Westat; David Kashihara, Agency for Healthcare Research and Quality

8:55 a.m. Evaluation of the Accuracy of Household Reports of Medical Expenditures for Visits to Physician Offices—Steven R. Machlin, Agency for Healthcare Research and Quality; ◊ David Kashihara, Agency for Healthcare Research and Quality; Diana Wobus, Westat

9:15 a.m. The Impact of Medical Expenditure Predictors in MEPS Nonresponse Adjustments—
  ◊ Lap-Ming Wun, Agency for Healthcare Research and Quality; Trena Ezzati-Rice, Agency for Healthcare Research and Quality; Steven B. Cohen, Agency for Healthcare Research and Quality; William Yu, Agency for Healthcare Research and Quality

9:35 a.m. Evaluation of Expenditure Estimates When Including a High-Expenditure Predictor in Nonresponse Adjustments—Lap-Ming Wun, Agency for Healthcare Research and Quality; Trena Ezzati-Rice, Agency for Healthcare Research and Quality; Steven B. Cohen, Agency for Healthcare Research and Quality; William Yu, Agency for Healthcare Research and Quality

9:55 a.m. Approximation of Skewed Health Care Expenditure Distribution Using a Mixture Model—◊ William Yu, Agency for Healthcare Research and Quality

10:15 a.m. Floor Discussion
The future of statistics education is
W. H. FREEMAN & COMPANY

New!
The Basic Practice of Statistics, Fourth Edition
David S. Moore
The new edition of the bestselling one-term data analysis textbook features almost 50% new exercises, a new 4-step problem solving process, a new commentary on data ethics, updated examples, and accessible technology, including NEW CrunchIt! Output screens in the Using Technology sections.

And introducing
STATS PORTAL
Preview at www.whfreeman.com/statsportaldemo

One click, one place, for all the statistical tools you and your students need. NEW for Fall 2006, StatsPortal for The Basic Practice of Statistics is an online Course Management and Homework System which integrates a rich suite of assessment, diagnostic, tutorial, and enrichment features.

Also from W. H. Freeman

David Moore and George P. McCabe
With its focus on data analysis, statistical reasoning, and the way statisticians actually work, Introduction to the Practice of Statistics (IPS) brings the power of critical thinking and practical applications to today’s statistics classroom.

Statistics: Concepts and Controversies, Sixth Edition
David Moore and William I. Notz
Written for today’s liberal arts students, Statistics: Concepts and Controversies presents statistics not as a technical tool but as a way of understanding our world.

The Practice of Business Statistics
David Moore,
George P. McCabe,
William Duckworth III,
and Stephen Sclove
A breakthrough text that gives students the tools they need to make data-informed, real-world business decisions.

For more information, stop by booth #300-302.

### Topic-Contributed Panels 8:30 a.m.–10:20 a.m.

#### 375

- **What Is Feminist Statistics?—Topic-Contributed**  
  Social Statistics Section, Caucus for Women in Statistics, Section on Government Statistics, Section on Statistical Education  
  Organizer(s): Mary W. Gray, American University  
  Chair(s): Mary W. Gray, American University  
  Panelists:  
  - Martha Aliaga, American Statistical Association  
  - Arlene Ash, Boston University  
  - Eduardas Valaitis, American University  
  10:15 a.m. Floor Discussion

#### 376

- **Mentoring Statisticians—Topic-Contributed**  
  Section on Statistical Education, Committee on Career Development  
  Organizer(s): Snehalata Huzurbazar, University of Wyoming  
  Chair(s): Snehalata Huzurbazar, University of Wyoming  
  Panelists:  
  - Amy Froelich, Iowa State University  
  - Sastry Pantula, North Carolina State University  
  - Sally C. Morton, RTI International  
  - Cynthia Clark, U.K. Office for National Statistics  
  - Ronald Menton, Wyeth Research  
  10:15 a.m. Floor Discussion

#### 377

- **Capture-Recapture and Other Problems in Environmental and Ecological Statistics—Contributed**  
  Biometrics Section, ENAR  
  Chair(s): Linda Young, University of Florida  
  8:35 a.m. Semiparametric Models for Capture-Recapture Experiments with Behavioral Response— Wen-Han Hwang, Feng Chia University; Richard Huggins, University of Melbourne  
  8:50 a.m. Population Estimation for Noninvasive Trapping— Emily Murphree, Miami University  
  9:05 a.m. Assessing Similarity of Two Assemblages with Unseen Species in Samples— Tsung-Jen Shen, National Chung Hsing University; Anne Chao, National Tsing Hua University; Robin L. Chazdon, University of Connecticut; Robert L. Colwell, University of Connecticut  
  9:20 a.m. Estimating the Species Richness by a Poisson-Compound Gamma Model— Ji-Ping Wang, Northwestern University  
  9:35 a.m. Mixtures of Exponential Distributions To Describe the Distribution of Poisson Means in Estimating the Number of Unobserved Classes— Kathryn Barger, Cornell University  
  9:50 a.m. Principle Component Analysis as a Statistical Tool To Investigate the Role of Specific Habitat Variables in Lyme Disease Ecology— Haiyan Chen, Dana-Farber Cancer Institute  
  10:05 a.m. Floor Discussion
378  
CC-308  
● Models for Multivariate (Longitudinal) Data—Contributed  
Biometrics Section, ENAR  
Chair(s): Armando Teixeira-Pinto, Harvard School of Public Health  
8:35 a.m.  
Alternative Structural Models for Analyzing Multivariate Longitudinal Data—❖ Feng Gao, Washington University School of Medicine; Paul Thompson, Washington University School of Medicine; Chengjie Xiong, Washington University School of Medicine; J. Philip Miller, Washington University School of Medicine  
8:50 a.m.  
Unconstrained Models for the Covariance Structure of Multivariate Longitudinal Data—❖ Chulmin Kim, University of Minnesota, Morris; Dale Zimmerman, The University of Iowa  
9:05 a.m.  
Multilevel Flexible Models for Mixed Longitudinal Data—❖ Nuoo-Ting Molitor, University of Southern California; Kiros Berhane, University of Southern California  
9:20 a.m.  
Conditional Estimation for Joint Models for a Primary Endpoint and Multivariate Longitudinal Data—❖ Erning Li, Texas A&M University; Naisyin Wang, Texas A&M University; Nae-Yuh Wang, The Johns Hopkins University School of Medicine  
9:35 a.m.  
A Bayesian Approach to Modeling Associations between Pulsatile Hormones—❖ Nichole Carlson, Oregon Health & Science University; Timothy D. Johnson, University of Michigan; Morton B. Brown, University of Michigan  
9:50 a.m.  
Floor Discussion  

379  
CC-608  
● Robust Solutions—Contributed  
Business and Economics Statistics Section  
Chair(s): Michael Sverchkov, Bureau of Labor Statistics/BAE Systems IT  
8:35 a.m.  
On Robust Forecasting in Dynamic Vector Time Series Models—❖ Pierre Duchesne, Université de Montréal; Christian Gagné, Université de Montréal  

Come by the SAGE Publications Booth at JSM!  
New and Essential Books on Display:
8:50 a.m.  A Test of the Modality of the Variance Function in Modulated Autoregressive Models—❖ Gabe Chandler, Connecticut College
9:05 a.m.  Multiple Imputation of Right-Censored Data: an Application to Wage Data and Understanding the Changing Wage Gap by Gender in Germany—❖ Hermann Gartner, Institute for Employment Research
9:20 a.m.  A New Approach to Univariate Unit Root Tests Robust to Structural Change—❖ Seong-Tae Kim, North Carolina State University
9:35 a.m.  Testing for Threshold Moving Average with Conditional Heteroscedasticity—❖ Guodong Li, The University of Hong Kong; Wai K. Li, The University of Hong Kong
9:50 a.m.  A New Approach for Calculating Sample Size To Detect Desired Difference between Treatment Groups with Intended Power—❖ Seemit Sheth, Capital One Financial Corporation
10:05 a.m.  Competitiveness Analysis of the Italian Firms: Use of Robust Classification Methods—❖ Matilde Bini, University of Florence; Luigi Biggeri, Italian National Statistical Institute

380  Flexible Methods for Longitudinal Data—Contributed
ENAR, Biometrics Section
Chair(s): Andres Houseman, Harvard School of Public Health
8:35 a.m.  Efficient Estimation in Semiparametric Generalized Linear Model for Longitudinal Data—❖ Lu Wang, Harvard University; Xihong Lin, Harvard School of Public Health; Andrea Rotnitzky, Harvard University
8:50 a.m.  Varying-Coefficient Model with Unknown within-Subject Covariance for the Analysis of Tumor Growth Curves—❖ Robert Krafty, University of Pennsylvania; Wensheng Guo, University of Pennsylvania; Phyllis Gimotty, University of Pennsylvania; George Coukos, University of Pennsylvania
9:05 a.m.  Modeling Plasma HIV Viral Load by a Piecewise Polynomial Linear Mixed Model—❖ Hsiao-Chuan Tien, The University of North Carolina at Chapel Hill; Pai-Lien Chen, Family Health International
9:20 a.m.  Nonparametric Inference in the Heteroscedastic Two-Way Random Effects Model Based on Ranks—❖ Zhe Shang, Wyeth Research
9:35 a.m.  Marginal Regression Modeling under Irregular, Biased Sampling—❖ Petra Buzkova, The University of North Carolina at Chapel Hill; Thomas Lumley, University of Washington
9:50 a.m.  Projected Multivariate Linear Mixed-Effects Models for Clustered Angular Data—❖ Daniel Hall, University of Georgia; Lewis Jordan, University of Georgia; Jinae Lee, University of Georgia
10:05 a.m.  Optimal Estimators from Generalized Estimating Equations (GEE) for Longitudinal Data—❖ Ioana Schiopu-Kratina, Statistics Canada; Raluca M. Balan, University of Ottawa

381  Survival, Time to Event—Contributed
Biopharmaceutical Section, Biometrics Section, ENAR
Chair(s): B. Christine Clark, ICON Clinical Research
8:35 a.m.  Predicting Time of Completion in Multiphase Survival Trials—❖ Dennis Sweitzer, AstraZeneca Pharmaceuticals
8:50 a.m.  Power Calculation for Log-Rank Test under a Nonproportional Hazards Model—❖ Daowen Zhang, sanofi-aventis; Hui Quan, sanofi-aventis
9:05 a.m.  Use of Life Tables To Extrapolate Survival from Clinical Trial Data—❖ W. J. Hall, University of Rochester Medical Center; Hongyue Wang, University of Rochester Medical Center
9:20 a.m.  Analyzing Change in Hazard for Time-to-Event Endpoints in Clinical Trials—❖ Rafia Bhore, U.S. Food and Drug Administration; Sandra Gardner, Sunnybrook Health Sciences Centre
9:35 a.m.  Time to Rescue as a Surrogate Endpoint for Analgesic Efficacy in Acute Pain Studies—❖ Julia Wang, Johnson & Johnson Pharmaceutical R&D; Akiko Okamoto, Johnson & Johnson Pharmaceutical R&D; Surya Mohanty, Johnson & Johnson Pharmaceutical R&D
9:50 a.m.  On Analysis of Time to Progression—❖ Zhiping Sun, Merck & Co., Inc.; Cong Chen, Merck & Co., Inc.
10:05 a.m.  Testing for Change-Points in Waiting Time Distributions—❖ Thomas Hammerstrom, U.S. Food and Drug Administration; Rafia Bhore, U.S. Food and Drug Administration

Bayesian Design and High-Dimensional Inference—Contributed
Section on Bayesian Statistical Science
Chair(s): Ming Yuan, Georgia Institute of Technology
8:35 a.m. Automatic Estimation of Multivariate Spectra via Smoothing Splines—Ori Rosen, The University of Texas at El Paso; David Stoffer, University of Pittsburgh
8:50 a.m. Bayesian Curve Estimation with Overcomplete Wavelet Dictionary—Jen-hwa Chu, Duke University; Merlise Clyde, Duke University; Feng Liang, Duke University
9:05 a.m. Bayesian LAGO for Statistical Detection Problems—Wanhua Su, University of Waterloo; Mu Zhu, University of Waterloo; Hugh A. Chipman, Acadia University
9:20 a.m. Avoiding Bias from Feature Selection in Classification and Regression Models—Longhai Li, University of Toronto; Jianguo Zhang, University of Toronto; Radford Neal, University of Toronto
9:35 a.m. Dose-Schedule Finding in Phase I/II Clinical Trials Using Bayesian Isotonic Transformation—Yisheng Li, M.D. Anderson Cancer Center; Nebiyou B. Bekele, M.D. Anderson Cancer Center; Yuan Ji, M.D. Anderson Cancer Center; John Cook, M.D. Anderson Cancer Center
9:50 a.m. Bayesian Two-Stage Optimal Design for Generalized Linear Models—Ying Zhang, Virginia Polytechnic Institute and State University
10:05 a.m. Floor Discussion

386
Bayesian Applications to Genetics—Contributed
Section on Bayesian Statistical Science, Biometrics Section, ENAR
Chair(s): Leanna House, Duke University
8:35 a.m. The Evolutionary Forest Algorithm—Scotland Leman, Duke University
8:50 a.m. Bayesian Inference for Estimating Migration Rate, Mutation Rate, and Population Size in Microsatellite Loci—Seongho Song, University of Cincinnati; Dipak Dey, University of Connecticut; Kent E. Holsinger, University of Connecticut

9:05 a.m. Bayesian Discovery of Regulatory Motifs Using Reversible Jump Markov Chain Monte Carlo—Min Li, University of Washington
9:20 a.m. Detection of Quantitative Trait Loci on Multiple Linkage Groups—Patrick Gaffney, ImClone Systems
9:35 a.m. Bayesian Clustering of SNP Genotypes—Guohua Yan, The University of British Columbia; William J. Welch, The University of British Columbia; Ruben H. Zamar, The University of British Columbia
9:50 a.m. Bayesian Clustering of Short Temporal Gene Expression Dynamics—Ling Wang, Boston University; Paola Sebastiani, Boston University; Marco Ramoni, Harvard Medical School
10:05 a.m. A Bayesian Retrospective Classification Model—Jingqin Luo, Duke University

387
Sample Survey Quality IV—Contributed
Section on Survey Research Methods
Chair(s): Rita Petroni, U.S. Census Bureau
8:35 a.m. Changing to Register-Based Statistics—Anders Wallgren, Statistics Sweden; Britt Wallgren, Statistics Sweden
8:50 a.m. Longitudinal Evaluation of Point and Variance Estimates in an Establishment Survey after Ratio Imputation—Adriana Perez, The University of Texas Health Science Center at Houston
9:05 a.m. Experimental Design for the 2006 American Community Survey Content Test—Mark Asiala, U.S. Census Bureau; Alfredo Navarro, U.S. Census Bureau
9:20 a.m. A Comparison of Two Ratio Edit Methods for the Annual Survey of Government Finances—Elizabeth Cornett, U.S. Census Bureau; Joanna F. McLaughlin, U.S. Census Bureau; Carma R. Hogue, U.S. Census Bureau; Stephen D. Owens, U.S. Census Bureau
9:50 a.m. A Coverage Profile of Area Frame Blocks on the United States Census Bureau's Master Address File—Timothy Kennel, U.S. Census Bureau
10:05 a.m. Floor Discussion
A single person can make a difference.

Five thousand people make all the difference in the world.

At Allergan, we welcome people who want to improve people’s lives. Every day, our products meet crucial medical needs, and we’ve got more exciting products and technologies on the way. Today, we’re looking to increase our R&D staff, to bring those products to market and share in our vision for the future.

Join our team, and discover how much we can achieve together. We currently have opportunities in the following Pharmaceutical and Biopharmaceutical areas:

- Biology/Microbiology
- Biostatistics
- Chemistry
- Clinical Data Management
- Clinical Programming
- Clinical Research
- Medical Writing
- Clinical Quality and Training
- Regulatory Affairs
- Regional Clinical Trial Management
- Statistical Programming
- Pharmaceutical Analysis
- Formulation Development
- Clinical Manufacture

We offer a competitive salary, excellent benefits and a great working environment. Allergan headquarters, in beautiful Orange County, CA, feature a 28-acre campus-like setting with on-site recreational facilities. To learn more about these opportunities, visit www.allergan.com/site/careers.

www.allergan.com

Allergan is committed to employing a diverse workforce. EOAM/AAEHV

Cluster Modeling and Cluster Detection—Contributed
Section on Statistics in Epidemiology
Chair(s): Margaret Nemeth, Monsanto Regulatory Sciences
8:35 a.m. P-Values for the Besag-Newell Cluster Detection Test—Ronald Gangnon, University of Wisconsin-Madison
8:50 a.m. On Detecting a Rate Increase Using a Bernoulli-Based Scan Statistic—Michael Joner, Virginia Polytechnic Institute and State University; William H. Woodall, Virginia Polytechnic Institute and State University; Marion Reynolds, Virginia Polytechnic Institute and State University
9:05 a.m. Spatial Survival Clusters of Patients Diagnosed with Lung Cancer and Late-Stage Colorectal Cancer in California—Lan Huang, National Cancer Institute
9:20 a.m. A Latent Model for Highly Skewed and Grouped Data—Huichao Chen, Emory University; Amita K. Manatunga, Emory University; Robert Lyles, Emory University; Michele Marcus, Emory University
9:35 a.m. Local Likelihood Models for Disease Cluster Modeling: a Space-Time Extension—Monir Hossain, University of South Carolina; Andrew B. Lawson, University of South Carolina
9:50 a.m. Approximating the Multiple-Width-Window Scan Statistic for Nonuniform Background—Joseph Naus, Rutgers University
10:05 a.m. Cluster Analysis Using Methods of Pairwise Weight on Mixed Type Attributes—William Warde, Oklahoma State University

389 CC-620
Methodology for Spatial Data—Contributed
Section on Statistics and the Environment, WNAR
Chair(s): Eric Slud, U.S. Census Bureau
8:35 a.m. Spatial Multivariate EOFs: Discrete to Continuous Approximations—Yonggang Yao, The Ohio State University; Noel Cressie, The Ohio State University
8:50 a.m. Spatial Designs and Strength of Spatial Signal: Effects on Covariance Estimation—Kathryn Irvine, Oregon State University; Alix Gitelman, Oregon State University; Jennifer A. Hoeting, Colorado State University

390 CC-605
Survey-Based Estimation IV—Contributed
Section on Survey Research Methods
Chair(s): Mansour Fahimi, RTI International
8:35 a.m. Effects of Uncontrolled Factors at the Collection Stage on the Canadian Nutrition Survey—François Verret, Statistics Canada; Steven Thomas, Statistics Canada
8:50 a.m. Regression Diagnostics for Survey Data—Jianzhu Li, University of Maryland; Richard Valliant, University of Michigan
9:05 a.m. Design Effects in Randomized Experiments Based on Sample Surveys—K. P. Srinath, Abt Associates Inc.
9:20 a.m. Using Census Data to Define Estimation Areas for the American Community Survey: a Case Study—Joseph Powers, U.S. Census Bureau; Alfredo Navarro, U.S. Census Bureau
10:05 a.m. Estimation and Reliability Issues of Health Estimates from the Behavioral Risk Factor Surveillance System for U.S. Counties Contiguous
to the United States-Mexico Border — Joe Fred Gonzalez, Jr., National Center for Health Statistics; Machell Town, National Center for Chronic Disease Prevention and Health Promotion; Jay J. Kim, National Center for Health Statistics; Sam Notzon, National Center for Health Statistics; Juan R. Albertorio, National Center for Health Statistics

Invited Panels 10:30 a.m.–12:20 p.m.

402 CC-609

● Statistical Consulting for Clinical Research—Invited
Section on Statistical Consulting, Section on Statistical Education
Organizer(s): Jeff Sloan, Mayo Clinic College of Medicine
Chair(s): Joseph Cappelleri, Pfizer Inc.
Panelists:
❖ Jeff Sloan, Mayo Clinic College of Medicine
❖ Todd Nick, Cincinnati Children's Hospital Medical Center
❖ Felicity B. Enders, Mayo Clinic College of Medicine
❖ Michael Griswold, The Johns Hopkins Bloomberg School of Public Health

12:15 p.m. Floor Discussion

Topic-Contributed Sessions
10:30 a.m.–12:20 p.m.

403 CC-612

● Statistics for Weather Forecasting I: Challenges and Opportunities—Topic-Contributed
Section on Statisticians in Defense and National Security, Section on Physical and Engineering Sciences, Section on Statistics and the Environment
Organizer(s): Tilmann Gneiting, University of Washington
Chair(s): Tilmann Gneiting, University of Washington

10:35 a.m. General Introduction to Weather Prediction—❖ Clifford Mass, University of Washington
10:55 a.m. Local Bayesian Model Averaging for Calibrated Weather Forecast Probabilities—❖ Eric Grimit, University of Washington
11:15 a.m. Combining Spatial Statistical and Ensemble Information in Probabilistic Weather Forecasts—❖ Veronica Berrocal, University of Washington
11:35 a.m. Use of Uncertainty Information in Deterministic Weather Forecasting Decisions—❖ Susan Joslyn, University of Washington
11:55 a.m. Disc: Brad Colman, National Oceanic & Atmospheric Administration
12:15 p.m. Floor Discussion
404
Dose-Finding—Topic-Contributed
Biopharmaceutical Section, Biometrics Section, ENAR
Organizer(s): Naitee Ting, Pfizer Inc.
Chair(s): Greg C. G. Wei, Pfizer Inc.

10:35 a.m. Hypothesis Testing and Bayesian Estimation Applied to Sparse Dose Response Designs—❖Neal Thomas
11:15 a.m. Design and Analysis of Dose-Finding Studies Combining Multiple Comparisons and Modeling Procedures—❖Frank Bretz, Novartis Pharma AG; Jose Pinheiro, Novartis Pharmaceuticals Corporation; Bjoern Bornkamp, University of Dortmund
11:35 a.m. Optimal Dose Response Studies with Potentially Missing Observations—❖Weng Kee Wong, University of California, Los Angeles; InYoung Baek, Stony Brook University; Wei Zhu, Stony Brook University
11:55 a.m. Experimental Design for Experiments with Toxicity and Efficacy Response Functions—❖Nancy Flournoy, University of Missouri-Columbia
12:15 p.m. Floor Discussion

405
• Modeling and Adjustment of Economic Time Series—Topic-Contributed
Business and Economics Statistics Section
Organizer(s): Thomas D. Evans, Bureau of Labor Statistics
Chair(s): Thomas D. Evans, Bureau of Labor Statistics

10:35 a.m. Reference Week Adjustment of Labor Force Series with X-12-ARIMA—❖Zhao-Guo Chen, Statistics Canada; Thierno A. Balde, Statistics Canada; Benoit Quenneville, Statistics Canada; Helen Fung, Statistics Canada
10:55 a.m. Issues in Identifying Easter Effects in Economic Time Series—❖Kellie Wills, U.S. Census Bureau
11:15 a.m. A New Time Series Model for Seasonally Adjusting Economic Data with Trend-Cycle Movement and Irregular, Sharply Pronounced Seasonal Fluctuations—❖Stephanus Arz, Deutsche Bundesbank
11:35 a.m. An ARIMA Model-Based Approach To Estimate Evolving Trading Day Effect—❖Xichuan Zhang, Australian Bureau of Statistics; Anna Poskitt, Australian Bureau of Statistics
12:15 p.m. Floor Discussion

406
• When Disaster Strikes: Responses from the Survey Community—Topic-Contributed
Section on Survey Research Methods, Section on Statisticians in Defense and National Security
Organizer(s): Rachel Harter, National Opinion Research Center
Chair(s): David Banks, Duke University

10:35 a.m. Conducting Surveys When Disasters Strike—❖Rachel Harter, National Opinion Research Center; Judith Petty, National Opinion Research Center; Jenny Kelly, National Opinion Research Center
10:55 a.m. On the Use of Survey Methods in Assessing Large-Scale Human Rights Violations in Conflict Zones: Lessons-Learned from Timor-Leste and Sierra Leone—❖Romesh Silva, Human Rights Data Analysis Group; Patrick Ball, Human Rights Data Analysis Group
11:15 a.m. Impact of Gulf Hurricanes on the National Immunization Survey—❖Kirk Wolter, National Opinion Research Center; James Singleton, Centers for Disease Control and Prevention
11:35 a.m. Local Data Coordination and Dissemination in Post-Katrina New Orleans—❖Allison Plyer, Greater New Orleans Nonprofit Knowledge Works
11:55 a.m. Disc: Alan R. Tupek, U.S. Census Bureau
12:15 p.m. Floor Discussion

407
• Statistical Issues in Diagnostic Devices Including ROC Methods—Topic-Contributed
Section on Statistics in Epidemiology, Biometrics Section, ENAR
Organizer(s): R. Lakshmi Vishnuvajjala, U.S. Food and Drug Administration
Chair(s): Kyunghee Song, U.S. Food and Drug Administration

10:35 a.m. ROC Graphs for Assessing the Ability of a Diagnostic Marker To Detect Three Disease Classes with an Umbrella Ordering—❖Todd Alonzo, University of Southern California; Christos Nakas, University of the Aegean
### GENERAL PROGRAM SCHEDULE

<tbody>
<tr>
<td>10:35 a.m.</td>
<td>A Model of AFLP Evolution and Its Use in Bayesian Estimation of Phylogenies</td>
<td>Ruiyan Luo, University of Wisconsin-Madison; Bret Larget, University of Wisconsin-Madison</td>
</tr>
<tr>
<td>10:55 a.m.</td>
<td>A Random Duplication/Deletion Model in Genome Rearrangement</td>
<td>Soowan Sohn, University of Wisconsin-Madison; Bret Larget, University of Wisconsin-Madison</td>
</tr>
<tr>
<td>11:15 a.m.</td>
<td>Spatially Smoothed Change-Point Processes for Phylogenetic Mapping of Recombination Hot Spots</td>
<td>Vladimir N. Minin, University of California, Los Angeles; Marc A. Suchard, University of California, Los Angeles; Karin S. Dorman, Iowa State University; Fang Fang, Iowa State University</td>
</tr>
</tbody>
</table>

### 410 - CC-3B

**Bayesian Spatial Models—Topic-Contributed**

*Section on Bayesian Statistical Science*

**Organizer(s): Paul Speckman, University of Missouri-Columbia**

**Chair(s): Galin Jones, University of Minnesota**

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
<th>Presenter(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>10:35 a.m.</td>
<td>Hierarchical Bayes Estimation of Response Rates with Spatial Correlations</td>
<td>Xiaoming Gao, Missouri Department of Conservation; Chong He, University of Missouri-Columbia; Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia</td>
</tr>
</tbody>
</table>
10:55 a.m. Reference Priors for Gaussian Processes with Spatial Correlation Structure—Mi Hyun Lee, Virginia Polytechnic Institute and State University; Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia

11:15 a.m. Bayesian Spatial-Temporal Smoothing of Cancer Mortality Rates—Gentry White, University of Missouri-Columbia; Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia; Paul Speckman, University of Missouri-Columbia

11:35 a.m. Spatially Adaptive Bayesian Thin-Plate Splines—Yu Yue, University of Missouri-Columbia

11:55 a.m. Bayesian Smoothing of Density Estimation via Hazard Rates—Luyan Dai, University of Missouri-Columbia

12:15 p.m. Floor Discussion

411 Multidimensional Scaling and Manifold Learning—Topic-Contributed

Section on Statistical Computing, IMS, Section on Statisticians in Defense and National Security

Organizer(s): Michael W. Trosset, The College of William & Mary
Chair(s): David W. Scott, Rice University

10:35 a.m. Parametric Mapping (PARAMAP): an Approach to Nonlinear Mapping—Ulas Akkucuk, Bogazici University

10:55 a.m. Metric MDS to Surfaces—David Johannsen, Naval Surface Warfare Center; Jeffrey L. Solka, Naval Surface Warfare Center

11:15 a.m. Local Multidimensional Scaling: a Nonlinear Dimension Reduction Method for Data Visualization—Lisha Chen, University of Pennsylvania; Andreas Buja, University of Pennsylvania

11:35 a.m. Classical Multidimensional Scaling and Laplacian Eigenmaps—Michael W. Trosset, The College of William & Mary

11:55 a.m. Manifold Learning and Dimensionality Reduction for Classification—Alfred Hero, University of Michigan; Raviv Raich, University of Michigan; Jose Costa, California Institute of Technology

12:15 p.m. Floor Discussion

412 Multivariate Control Charts and Other Related Topics—Topic-Contributed

Section on Quality and Productivity, Section on Physical and Engineering Sciences

Organizer(s): Arthur Yeh, Bowling Green State University
Chair(s): Jane Chang, Bowling Green State University

10:35 a.m. Single Variables Control Chart: an Overview—Smiley Cheng, University of Manitoba; Keoagile Thaga, University of Botswana

11:15 a.m. The Multivariate Exponentially Weighted Moving Average—Steve Rigdon, Southern Illinois University; Nicole Munden, University of Missouri

11:35 a.m. Monitoring Multivariate Process Variability for Individual Observations—Baiyau Yeh, Bowling Green State University

11:55 a.m. Disc: Herb McGrath, Bowling Green State University

12:15 p.m. Floor Discussion

Topic-Contributed Panels
10:30 a.m.–12:20 p.m.

413 Assessing Student Retention of Essential Statistical Concepts, Issues, and Topics—Topic-Contributed

Section on Statistical Education

Organizer(s): Mark L. Berenson, Montclair State University
Chair(s): Mark L. Berenson, Montclair State University

Panelists: Leonard Gaines, Empire State Development
Albyn Jones, Reed College
Deborah Rumsey, The Ohio State University
Jessica Utts, University of California, Davis
Karen Kinard, Tallahassee Community College

12:15 p.m. Floor Discussion
### Regular Contributed Sessions

**10:30 a.m.–12:20 p.m.**

11:50 a.m.  Nonparametric Bayesian Bootstrap in ROC Curve Study—❖ Jiezhun Gu, North Carolina State University; Subhashis Ghosal, North Carolina State University

12:05 p.m.  Floor Discussion

417  CC-604

Combining Information, Missing Data, and Hierarchical Bayesian Methods for Health Outcomes Data—Contributed

Section on Health Policy Statistics, Biometrics Section, Section on Bayesian Statistical Science, ENAR

Chair(s): Christopher Schmid, Tufts-New England Medical Center

10:35 a.m.  Imputation and Forecasting for State Mortality—❖ Guanhua Lu, University of Maryland/National Center for Health Statistics; Benjamin Kedem, University of Maryland; Rong Wei, National Center for Health Statistics

10:50 a.m.  The Impact of Using Different Imputation Methods for Missing Quality-of-Life Scores on the Estimation of the Cost-Effectiveness of Lung Volume Reduction Surgery—❖ David Blough, University of Washington; Sean Sullivan, University of Washington; Scott Ramsey, Fred Hutchinson Cancer Research Center; Roger Yusen, Washington University School of Medicine

11:05 a.m.  Combining Information from Various Data Sources To Improve Analyses of Adjuvant Cancer Therapies—❖ Yulei He, Harvard Medical School; Alan M. Zaslavsky, Harvard Medical School

11:35 a.m.  Bayesian Simultaneous Intervals for Small Areas: an Application to Variation in Maps—❖ Erik B. Erhardt, University of New Mexico; Balgobin Nandram, Worcester Polytechnic Institute; Jai Choi, National Center for Health Statistics

11:50 a.m.  Spatial Statistical Methods for Small-Area Health Data with Application to the Association of Breast Cancer Incidence and Local Power Plant Emissions—❖ Heather Watson, New York University; Judith D. Goldberg, New York University School of Medicine; Mengling Liu, New York University School of Medicine

12:05 p.m.  Floor Discussion

418  CC-613

Bioinformatics—Contributed

Section on Statistical Computing, Biometrics Section, ENAR

Chair(s): Jie Ding, GlaxoSmithKline

10:35 a.m.  Linker DNA Length Preference in Human Chromatin Revealed by a Two-State Duration Hidden Markov Model—❖ Guei-Feng Tsai, Northwestern University; Ji-Ping Wang, Northwestern University; Jonathan Widom, Northwestern University

10:50 a.m.  A Systematic Benchmark of Dimension Reduction in Remote Homology Detection with Support Vector Machines—❖ Melissa M. Matzke, Pacific Northwest National Laboratory; Bobbie-Jo Webb-Robertson, Pacific Northwest National Laboratory; Christopher S. Oehmen, Pacific Northwest National Laboratory; Jorge F. Reyes Spindola, Pacific Northwest National Laboratory

11:05 a.m.  Using Microarray Gene-Coexpression Networks To Increase Gene Screening Validation Success and To Build Accurate Classifiers—❖ Wei Zhao, University of California, Los Angeles; Steve Horvath, University of California, Los Angeles; Paul Mischel, University of California, Los Angeles; Aldons J. Lusis, University of California, Los Angeles; Stanley Nelson, University of California, Los Angeles

11:20 a.m.  ANOVA Model-Based Pattern Recognition Technique—❖ Yushu Liu, University of Kentucky; R. Lakshman Chelvarajan, University of Kentucky; Thomas Getchell, University of Kentucky; Subbarao Bondada, University of Kentucky; Arnold J. Stromberg, University of Kentucky

11:35 a.m.  Canonical Parallel View and Adjustment for the Difference between Paired High-Dimensional Datasets—❖ Xuxin Liu, The University of North Carolina at Chapel Hill

11:50 a.m.  ProMAT: Protein Microarray Analysis Tool—❖ Amanda M. White, Pacific Northwest National Laboratory; Don S. Daly, Pacific Northwest National Laboratory; Susan S. Varnum, Pacific Northwest National Laboratory; Kevin K. Anderson, Pacific Northwest National Laboratory; Nikki Bollinger, Pacific Northwest National Laboratory; Rachel M. Gonzalez, Pacific Northwest National Laboratory; Richard C. Zangar, Pacific Northwest National Laboratory
12:05 p.m. Uncertainty in Clustering Posterior Distributions of Gene Expression Levels Using MCMC Samples—Tanzy Love, Carnegie Mellon University

419 CC-309
● Nonparametric Statistics with Censored Data—Contributed
Section on Nonparametric Statistics, ENAR
Chair(s): Sarah Baraniuk, The University of Texas School of Public Health

10:35 a.m. Nonparametric Significance Tests for Sums of Censored Random Variables—Golde Holtzman, Virginia Polytechnic Institute and State University; Carl E. Zipper, Virginia Polytechnic Institute and State University

10:50 a.m. Nonparametric Tests for Covariate Effects with Multistate Survival Data—Limin Peng, Emory University; Jason P. Fine, University of Wisconsin-Madison

11:05 a.m. Estimation for Two-Sample, Location-Scale Models under Type I Censorship—Xuewen Lu, University of Calgary

11:20 a.m. Nonparametric Maximum Likelihood Estimation of Hazard Function under Shape Restrictions—Desale Habtzghi, University of Georgia; Mary Meyer, University of Georgia; Somnath Datta, University of Louisville

11:35 a.m. Inference on the Quantile Function under Left Truncation and Right Censoring—Sana Buhamra, Kuwait University; Noriah Al-Kandari, Kuwait University

11:50 a.m. Empirical Likelihood Method for Heteroscedastic Linear Model—Hua Zhu, University of Kentucky; Mi-Ok Kim, University of Kentucky; Mai Zhou, University of Kentucky

12:05 p.m. Empirical Likelihood and Marginal Confidence Interval—Mi-Ok Kim, University of Kentucky

420 CC-310
Time Series and Temporal Correlation with Regression Applications—Contributed
Section on Physical and Engineering Sciences, Section on Statistics and the Environment
Chair(s): Stephan Sain, University of Colorado at Denver and Health Sciences Center

10:50 a.m. Nonparametric Kernel Estimates of Autocorrelation Structure from Single-Molecule Experimental Data—Tingting Zhang, Harvard University; Samuel Kou, Harvard University

11:05 a.m. Exploring Statistical Correlations among Nonlinear Time Series/Signals—Carolyn Morgan, Hampton University; Morris H. Morgan, Hampton University

11:20 a.m. Wavelet Variance Analysis for Random Fields—Debashis Mondal, University of Washington; Donald B. Percival, University of Washington

11:35 a.m. Wavelet-Based Estimation of Linear Regression Models with Two Errors: a Long Memory and a White Noise—Kyungduk Ko, Boise State University

11:50 a.m. Calibrating OLS Estimators in Linear Regression with Long Memory Error—Jaechoul Lee, Boise State University; Kyungduk Ko, Boise State University

12:05 p.m. On Improved Estimation in Linear Regression with Long Memory Errors—Mohamedou Ould Haye, Carleton University; A. K. Saleh, Carleton University

421 CC-615
● QTL Analysis and Mapping—Contributed
Biometrics Section
Chair(s): Haiyan Wang, Kansas State University

10:35 a.m. Strategies for Fine Mapping of QTL in Complex Pedigrees Using Combined Linkage and Linkage Disequilibrium Method—Natascha Vukasinovic, Monsanto Company; Fengxing Du, Monsanto Company

10:50 a.m. A New Statistical Model for Dissecting the Genetic Basis of Heterosis through Multiple Interval Mapping (MIM) in Design III Populations—Antonio A. F. Garcia, Escola Superior de Agricultura “Luiz de Queiroz”; Zhao-Bang Zeng, Bioinformatics Research Center

11:05 a.m. A Semiparametric Approach for Functional Genetic Mapping of Long-Term HIV Dynamics—Song Wu, University of Florida; Jie Yang, University of Florida; Rongling Wu, University of Florida

11:20 a.m. A Semiparametric Approach to K Mixtures of Two Components with Application to the
Mapping of Quantitative Trait Loci—Shiju Zhang, The University of Toledo; Biao Zhang, The University of Toledo; Grier P. Page, The University of Alabama at Birmingham

11:35 a.m. Functional Mapping of Time-Warped Developmental Trajectories Based on B-Splines—Xueli Liu, University of Florida; Rongling Wu, University of Florida

11:50 a.m. Combining QTL Analysis and Bayesian Network Discovery Methods To Determine Genetic Relationships in a Microrray/Marker Dataset—Christine W. Duarte, North Carolina State University; Zhao-Bang Zeng, Bioinformatics Research Center

12:05 p.m. A Statistical Approach for Genome-Wide Scan and Testing Imprinted Quantitative Trait Loci—Yuehua Cui, Michigan State University

423

• Binary Data—Contributed

Biopharmaceutical Section, Biometrics Section, ENAR

Chair(s): Keith Soper, Merck & Co., Inc.

10:35 a.m. A Multiplicative Heteroscedasticity Model for Clustered Binary Data—Mitchell Rosen, Omnicare Clinical Research

10:50 a.m. Design and Analysis of Active Control Noninferiority Trials with Binary Data—Yu-Yun Ho, Johnson & Johnson Pharmaceutical R&D; Sudhakar Rao, Johnson & Johnson Pharmaceutical R&D; George Chi, Johnson & Johnson Pharmaceutical R&D

11:05 a.m. A Note on Sample Size Re-estimation with Interim Binary Data for Double-Blind Clinical Trials—Xiaohui Luo, Merck & Co., Inc.; Peng-Liang Zhao, Kyowa Pharmaceutical, Inc.

11:20 a.m. More Powerful Analyses of Stratified NonInferiority Trials with Binary Endpoints—Devan V. Mehrotra, Merck Research Laboratories; William W. B. Wang, Merck Research Laboratories

11:35 a.m. Estimation of Multiple Response Rates in Clinical Trials with Missing Observations—Myron Chang, University of Florida

11:50 a.m. Choice of Working Correlation Structure for a GEE-Based Analysis of Incomplete Longitudinal Binary Data—Priya Kulkarni, Merck Research Laboratories; Devan V. Mehrotra, Merck Research Laboratories; Xiaoming Li, Novartis Pharmaceuticals Corporation

12:05 p.m. Constructing Better Binomial Confidence Intervals by Remembering Three Lessons from Normal Data—Craig Borkowf, Centers for Disease Control and Prevention

424

• Missing Data—Contributed

Biopharmaceutical Section, Biometrics Section

Chair(s): Soomin Park, Eli Lilly and Company

10:35 a.m. Statistical Methods To Analyze Incomplete Clinical Trial Data—Ohidul Siddiqui, U.S. Food and Drug Administration

10:50 a.m. Mixed Model: an Alternative to LOCF as Primary Analysis—Cunshan Wang, Pfizer Inc.; Naitee Ting, Pfizer Inc.; Greg C. G. Wei, Pfizer Inc.
11:05 a.m. **Estimating Treatment Effect in Clinical Trials with Disease-Dependant Noncompliance**—❖ Kuenhi Tsai, Vertex Pharmaceuticals Incorporated; Peter Westfall, Texas Tech University; Stephan Ogenstad, Vertex Pharmaceuticals Incorporated; Miles Dunn, Vertex Pharmaceuticals Incorporated

11:20 a.m. **Variability in Visit Times in Clinical Trials and the Implications for a Common Mixed Model for Repeated Measures**—❖ Tristan Massie, U.S. Food and Drug Administration

11:35 a.m. **Using Stochastic Differential Equations for Imputation of Missing Values in Longitudinal Clinical Data**—❖ Naum Khutoryansky, Novo Nordisk

11:50 a.m. **What Is a Suitable Definition of Study Information in Longitudinal Clinical Trials?**—❖ Guoquang Ma, Merck & Co., Inc.; Michael Nessly, Merck Research Laboratories

12:05 p.m. **A Local Influence Sensitivity Analysis for Incomplete Longitudinal Depression Data**—❖ Shuyi Shen, Eli Lilly and Company; Caroline Beunckens, Limburgs Universitair Centrum; Craig Mallinckrodt, Eli Lilly and Company; Geert Molenberghs, Limburgs Universitair Centrum

---

**425**

**Time Series Outliers and Filters—Contributed**

Business and Economics Statistics Section

Chair(s): Moon Jung Cho, Bureau of Labor Statistics

10:35 a.m. **Forecasting and Dynamic Updating of Time Series of Curves**—❖ Haipeng Shen, The University of North Carolina at Chapel Hill; Jianhua Z. Huang, Texas A&M University

10:50 a.m. **Tests for Changing Mean with Monotonic Power**—❖ Ted Juhl, The University of Kansas

11:05 a.m. **Some Ruin Problems with the Mixture Distribution**—❖ Min Deng, Maryville University

11:35 a.m. **Variance Change in Time Series ARIMA Models**—❖ Dongping Fang, SPSS Inc.

11:50 a.m. **Outlier Detection in Multiple Time Series by Projection Pursuit**—Galeano Pedro, Universidad de Compostela; ❖ Daniel Peña, Universidad Carlos III de Madrid; Ruey S. Tsay, The University of Chicago

12:05 p.m. **Longitudinal Microdata Outlier Detection Techniques**—❖ Eric Simants, Bureau of Labor Statistics

---

**426**

**Modeling of Genetic Data—Contributed**

Biometrics Section, ENAR

Chair(s): Yi He, University of Minnesota

10:35 a.m. **Likelihood of a Particular Order of Genetic Markers and the Construction of Genetic Maps**—❖ Susanta Tewari, University of Georgia

10:50 a.m. **Estimating Population Structure**—❖ Suja Sujit Samanta, North Carolina State University; Bruce S. Weir, University of Washington

11:05 a.m. **Inference of Dynamic Activity of Transcriptional Modules**—❖ Ron Yu, University of California, San Diego; Jie Liu, University of California, San Diego; Wei Wang, University of California, San Diego

11:20 a.m. **Performance of Phylo-HMM for Evolutionary Conserved Element Detection in Promoter Region**—❖ Xiaodan Fan, Harvard University; Jun Liu, Harvard University

11:35 a.m. **A Mixture Model Approach in Analyzing Genotype-Phenotype Association**—❖ Jason Robarge, Indiana University School of Medicine; Lang Li, Indiana University; David Flockhart, Indiana University School of Medicine

11:50 a.m. **On the Detection of DNA Copy Number Changes**—❖ Jie Chen, University of Missouri-Kansas City; Yu-Ping Wang, University of Missouri-Kansas City

12:05 p.m. **Including Current Ages in Aggregation and Linkage Analysis of Longevity**—❖ Jeanine Houwing-Duistermaat, Leiden University Medical Center; Andrea Callegaro, Leiden University Medical Center; Marian Beekman, Leiden University Medical Center; Rudi Westendorp, Leiden University Medical Center; Eline Slagboom, Leiden University Medical Center; Hans van Houwelingen, Leiden University Medical Center
427
● Statistical Methods in Genetics—Contributed
Biometrics Section, ENAR
Chair(s): Tracy Bergemann, University of Minnesota

10:35 a.m. Regional Admixture Mapping and Structured Association Testing: Conceptual Unification Using a General Linear Model—David Redden, The University of Alabama at Birmingham; Jasmin Divers, The University of Alabama at Birmingham; Kelly Vaughan, The University of Alabama at Birmingham; Hemant Tiwari, The University of Alabama at Birmingham; Mark Beasley, The University of Alabama at Birmingham; Jose R. Fernandez, The University of Alabama at Birmingham; Robert Kimberly, The University of Alabama at Birmingham; Rui Feng, The University of Alabama at Birmingham; Miguel Padilla, The University of Alabama at Birmingham; Nianjun Liu, The University of Alabama at Birmingham; Michael Miller, University of Minnesota; David B. Allison, The University of Alabama at Birmingham

10:50 a.m. Data Normalization of Stable-Isotope Labeled Peptides in Mass Spectrometry—Douglas Mahoney, Mayo Clinic College of Medicine; Ann L. Oberg, Mayo Clinic College of Medicine; Jeanette E. Eckel-Passow, Mayo Clinic College of Medicine; Terry M. Therneau, Mayo Clinic College of Medicine; Suresh T. Chari, Mayo Clinic College of Medicine; Unnikrishnan Gopinathan, Mayo Clinic College of Medicine; Lawrence E. Ward, Mayo Clinic College of Medicine; Xuan-Mai T. Persson, Mayo Clinic College of Medicine; Sreekumar Raghavakaimal, Mayo Clinic College of Medicine

11:05 a.m. A Genome-Wide Study on Transcriptional Regulation of Protein Complex in Saccharomyces Cerevisiae—Ching-Ti Liu, University of California, Los Angeles; Shinsheng Yuan, University of California, Los Angeles; Ker-Chau Li, University of California, Los Angeles

11:20 a.m. Comparative Validity and Power of Methods for Association-Testing with Related Individuals—Hemant Tiwari, The University of Alabama at Birmingham; Amit Patki, The University of Alabama at Birmingham; Mark Beasley, The University of Alabama at Birmingham; David B. Allison, The University of Alabama at Birmingham

11:35 a.m. Measuring Deviations from Hardy Weinberg Equilibrium in SNP Data—Vernon S. Pankratz, Mayo Clinic College of Medicine; Robert Vierkant, Mayo Clinic College of Medicine

11:50 a.m. An Algorithm for Finite Markov Chain Imbedding Approach—Lung-An Li, Academia Sinica

12:15 p.m. Floor Discussion

Regular Contributed Posters
10:30 a.m.–12:20 p.m.

428 CC-Level 6 East Lobby
Contributed Posters—Contributed
General Methodology, Section on Bayesian Statistical Science, Section on Statistics in Epidemiology, Biometrics Section, Section on Statistical Computing, Section on Health Policy Statistics, Section on Physical and Engineering Sciences, IMS, Section on Quality and Productivity
Organizer(s): Maura E. Stokes, SAS Institute, Inc.
Chair(s): Maura E. Stokes, SAS Institute, Inc.

Bayesian statistics, hierarchical models

01 The Relative Contribution Measures in Multilevel Modeling—Liyi Cen, University of Pennsylvania; Zhen Chen, University of Pennsylvania; Daniel E. Polsky, University of Pennsylvania; Kevin G. Volpp, University of Pennsylvania

02 Uncertainty Computation for the Virtual Cement and Concrete Testing Laboratory Measurements—Blaza Toman, National Institute of Standards and Technology; Charles Hagwood, National Institute of Standards and Technology; Adriana Hornikova, National Institute of Standards and Technology; Hung-kung Liu, National Institute of Standards and Technology; Nien Fan Zhang, National Institute of Standards and Technology

03 Alternative Methods for Variable Selection in Generalized Linear Models with Binary Outcomes for Incomplete Data—Gang Liu, University of California, Los Angeles

04 Analysis in Opinions about the Death Penalty in U.S. States—Shouhao Zhou, Columbia University; Andrew Gelman, Columbia University

05 Join-Point Analysis of Survival Data—Sandra Hurtado Rua, Northern Illinois University; Sanjib Basu, Northern Illinois University

Biometrics, biostatistics, epidemiology

06 Design-Based Calibration Estimators for Measurement
Error in the Cox Model—Thomas Lumley, University of Washington; Pam Shaw, University of Washington

ROC Curve Analysis in Osteoporosis Screening—James Powers, The University of North Carolina at Chapel Hill; Margaret Gourlay, The University of North Carolina at Chapel Hill; Kristine Ensrud, VA Medical Center

Feasibility of Genome-Wide Haplotype Association Studies with Small Sample Size and Sparsely Spaced SNPs—Shaokun Chuai, University of Pennsylvania; Nandita Mitra, University of Pennsylvania; Nathan Ellis, The University of Chicago

Bayesian State-Space Models for Predicting Temporal Gene Expression Profiles—Yulan Liang, University at Buffalo; Arpad Kelemen, Niagara University

Handling Missing Data for Smoking Cessation with Bootstrap, Trees, and Multiple Imputation—Jeff Thostenson, University of Arkansas for Medical Sciences; Lowell C. Dale, Mayo Clinic College of Medicine; Darrell Schroeder, Mayo Clinic College of Medicine; Heike Hofmann, Iowa State University

Analysis of Longitudinal Case-Control Zero-Heavy Data: Vaginal Shedding of HIV—Leann Myers, Tulane University; Hao He, Tulane University; Patricia Kissinger, Tulane University

SAS Estimation of Standard Errors for Partial Least Squares Regression—April Grant, University of Arkansas for Medical Sciences; David K. Williams, University of Arkansas for Medical Sciences; Zoran Bursac, University of Arkansas for Medical Sciences; Geoffrey M. Curran, University of Arkansas for Medical Sciences

Assessment of Capture-Recapture Methods in Estimating Populations of Oklahomans with Birth Defects—Robert C. Wild, The University of Oklahoma Health Sciences Center; Barbara Neas, The University of Oklahoma Health Sciences Center

Comparing Methods of Examining Trend Data for a Large Population—Kristen Eberly, The University of Oklahoma; Barbara Neas, The University of Oklahoma Health Sciences Center; David M. Thompson, The University of Oklahoma

Repeated Measurement of Gastric Myoelectric Activity in Obese Participants—Jiangyue Wang, The Pennsylvania State University

Salamander Cannibalism—Jean Ellis, California State University, East Bay; Erica Wildy, California State University, East Bay

Determining an Optimal Exposure Metric from a Bivariate Distribution of Asbestos Exposures (Length, Diameter) in a Cohort of South Carolina Textile Workers—Stephen Gilbert, National Institute for Occupational Safety and Health; Leslie T. Stayner, University of Illinois at Chicago; Eileen D. Kuempel, National Institute for Occupational Safety and Health; John D. Dement, Duke University Medical Center

Analysis of Respiratory Viral Exposure and Timing of Exposure During Infancy with Development of Childhood Asthma—Pingsheng Wu, Vanderbilt University School of Medicine; Tebeb Gebretsadik, Vanderbilt University School of Medicine; William Dupont, Vanderbilt University School of Medicine; Marie Griffin, Vanderbilt University School of Medicine; Rachel Enríquez, Vanderbilt University School of Medicine; Kecia Carroll, Vanderbilt University School of Medicine; Tina Hartert, Vanderbilt University School of Medicine

Evaluating the Predictiveness of a Continuous Marker in Case-Control Design—Ying Huang, University of Washington; Margaret S. Pepe, Fred Hutchinson Cancer Research Center/University of Washington

Variable Selection in the Multivariate Adaptive Regression Splines (MARS)-Logit Models To Detect Gene-Gene Interactions—Huiyi Lin, Louisiana State University Health Sciences Center; Cruz Velasco, Louisiana State University Health Sciences Center; Jennifer J. Hu, Louisiana State University Health Sciences Center

A Comparison of Three Categorical Data Analysis Methods Applied to Survey Data—Barbara Neas, The University of Oklahoma Health Sciences Center; Hani Dimassi, The University of Oklahoma Health Sciences Center; David M. Thompson, The University of Oklahoma; Betty J. Pfefferbaum, The University of Oklahoma Health Sciences Center

Discrete Time Analysis of Mortality among Persons with Diabetes Using the Logit Model—Edward Tierney, Centers for Disease Control and Prevention
Bootstrap, resampling methods
24 Permutation Test and Its Application to the Youth Partners in Care (YPIC) Study—LINGQI TANG, University of California, Los Angeles; NAIHUA DUAN, University of California, Los Angeles; JOAN ASARNOW, University of California, Los Angeles

25 Comparison of Resampling Methods to Least Squares and Maximum Likelihood Methods for Estimating Fracture Strength Parameters of Glass Test Specimens—GERALD SHAUGHNESSY, University of Dayton; PETER HOVEY, University of Dayton

26 Stepwise Permutation Tests Using Medians—SCOTT RICHTER, The University of North Carolina at Greensboro; MELINDA MCCANN, Oklahoma State University

27 Resampling Methods in Asymptotic Statistical Inferences—FASSID NEBEBE, Concordia University; TAK K. MAK, Concordia University

Neuroscience, brain imaging
28 Surface Shape Analysis with an Application to Brain Cortical Surface Analysis in Schizophrenia—CHRISTOPHER BRIGNELL, University of Nottingham; IAN DRYDEN, University of Nottingham; WILLIAM BROWNE, University of Nottingham

Speaker Luncheon 12:30 p.m.–1:50 p.m.

429 CC-4C-1
Health Policy Statistics Speaker with Lunch (fee event)—Speaker with Lunch
Section on Health Policy Statistics
Organizer(s): Bonnie Ghosh-Dastidar, RAND Corporation

WL08 Mapping and Applications in Spatio-Temporal Public Health Data—BRADLEY P. CARLIN, University of Minnesota

Roundtables with Lunch
12:30 p.m.–1:50 p.m.

430 CC-4C-2
Biopharmaceutical Section Roundtables with Lunch (fee event)
Biopharmaceutical Section, Section on Statistical Consulting, Section on Statistical Graphics
Organizer(s): AMIT BHATTACHARYYA, GlaxoSmithKline

WL09 Procedures for Controlling the False Discovery Rate

in the Multiple Comparison Problems Involving Multiple Endpoint Tests in Clinical Trials—ARUNAVA CHAKRAVARTTY, University of California, Riverside

WL10 Bayesian Approaches to Clinical Trials—DINESH KUMAR, Eisai Medical Research

WL11 How Can Statisticians Better Contribute to Clinical Trials and Intervention Studies in Developing Countries?—CRAG BORKOWF, Centers for Disease Control and Prevention

WL12 Use of Propensity Scoring in Clinical Trials—DANIEL P. REYNER, Zimmer, Inc.

WL13 Increasing the Usage of Data from Cross-Over Studies—YONGHUA WANG, Bristol-Myers Squibb Company

WL14 Statistical Methods for Optimization of Development of Combination Products—TIMOTHY MONTAGUE, GlaxoSmithKline

WL15 How To Explain Complex Statistical Methods to Life Scientists—VADIM KUTSYY, Cytokinetics, Inc.

WL16 R-Based Data Analysis and Graphics Applications for Scientists: Moving beyond Excel—BERT GUNTER, Genentech, Inc.

WL17 Translational Medicine: from R to D and from D to R—CHI-HSE TENG, Pfizer Inc.; PATRICIA ENGLISH, Pfizer Inc.

WL18 Proof-of-Concept Studies—ROBERT SMITH, Bristol-Myers Squibb Company

WL19 Sensitivity Analysis for Missing Data in Clinical Trials—JIE ZHANG, Novartis Pharmaceuticals Corporation

WL20 Analysis of Cell-Based, High-Content Imaging Data—SHUANGUANG HUANG, Eli Lilly and Company

WL21 Interval Censored Time-to-Event Data: Examples, Analyses, and Assumptions—DAOHAI YU, Duke University

431 CC-4C-2
Business and Economics Statistics Section
Roundtable with Lunch (fee event)
Business and Economics Statistics Section
Organizer(s): DAVID DICKEY, North Carolina State University

WL22 Economic Aspects of Alternative Energy—MARGARET F. LAND, TeXas Environmental Studies and Analysis, LLC

442 Social Statistics Section Roundtable with Lunch (fee event)
CC-4C-3
Social Statistics Section
Organizer(s): Allen Schirm, Mathematica Policy Research, Inc.
WL35 The Next Survey Imperative: Being Proactive on Privacy—
❖ Gerald Gates, U.S. Census Bureau

443 Section on Teaching Statistics in the Health Sciences Roundtable with Lunch (fee event)
CC-4C-3
Section on Teaching Statistics in the Health Sciences
Organizer(s): Patrick Tarwater, The University of Texas Health Science Center at Houston
WL36 Distance Teaching and Learning in the Health Sciences—
❖ T. Robert Harris, The University of Texas at Dallas

Invited Sessions 2:00 p.m.–3:50 p.m.

444 JASA Applications and Case Studies Invited Session—Invited
CC-617
JASA, Applications and Case Studies, Section on Nonparametric Statistics
Organizer(s): Mark S. Kaiser, Iowa State University
Chair(s): Mark S. Kaiser, Iowa State University
2:05 p.m. Model-Assisted Estimation of Forest Resources with Generalized Additive Models—❖ Jean D. Opsomer, Iowa State University; F. Jay Breidt, Colorado State University; Gretchen Moisen, U.S. Forest Service; Goeran Kauermann, Universitaet Bielefeld
2:40 p.m. Disc: David Ruppert, Cornell University
2:55 p.m. Disc: Roderick J. Little, University of Michigan
3:10 p.m. Disc: Mary C. Christman, University of Florida
3:35 p.m. Floor Discussion

445 New Methods for Modeling Choice in Marketing—Invited
CC-211
Section on Statistics and Marketing
Organizer(s): Andrew Ainslie, University of California, Los Angeles
Chair(s): Andrew Ainslie, University of California, Los Angeles
2:05 p.m. Structural Estimation of Retail Demand and Inventory Decisions—❖ Andres Musalem, Wharton School of the University of Pennsylvania

2:55 p.m. Estimating Willingness To Pay with Random Coefficient Models—❖ Garrett Sonnier, University of California, Los Angeles
3:45 p.m. Floor Discussion

446 Nonparametric Inference—Invited
CC-606
IMS, Section on Nonparametric Statistics
Organizer(s): Tony Cai, University of Pennsylvania
Chair(s): Jiashun Jin, Purdue University
2:05 p.m. Statistical Inference for Evolving Periodic Functions—❖ Peter G. Hall, Australian National University
2:25 p.m. On Nonparametric Confidence Sets—❖ Tony Cai, University of Pennsylvania; Mark Low, University of Pennsylvania
2:50 p.m. Nonparametric Estimation of Eigenvectors—
❖ Iain Johnstone, Stanford University
3:40 p.m. Floor Discussion

447 Split-Plot Designs and Response Surface Analysis: the Interface—Invited
CC-604
Section on Quality and Productivity, Section on Physical and Engineering Sciences
Organizer(s): Martha Gardner, GE Global Research
Chair(s): Martha Gardner, GE Global Research
2:05 p.m. Standard Error Calculations for Estimators of Regression Coefficients in Split-Plot Designs—❖ Shaun Wulff, University of Wyoming; Timothy Robinson, University of Wyoming; Christine M. Anderson-Cook, Los Alamos National Laboratory
2:30 p.m. A Bayesian Approach to the Analysis of Split-Plot Experiments—❖ Peter Goos, Universiteit Antwerpen; Steven G. Gilmour, Queen Mary, University of London
2:55 p.m. Randomization-Based Analysis of Multistratum Response Surface Designs—❖ Steven G. Gilmour, Queen Mary, University of London
3:20 p.m. Testing for Lack-of-Fit in Split-Plot Response Surface Models—❖ Scott Kowalski, Minitab Inc.;
Geoff Vining, Virginia Polytechnic Institute and State University

3:45 p.m. Floor Discussion

448 CC-3B

● Adaptive Designs in Clinical Trials—Invited
Biopharmaceutical Section, ENAR, WNAR
Organizer(s): Sue-Jane Wang, U.S. Food and Drug Administration
Chair(s): Kao-Tai Tsai, Organon

2:05 p.m. Weighted and Unweighted Z-Tests in Sample Size Re-estimation—❖ Kuang-Kuo G. Lan, Johnson & Johnson Pharmaceutical R&D

2:30 p.m. Considerations in Use of Adaptive Designs in Drug Development—❖ Hsien-Ming Hung, U.S. Food and Drug Administration

2:55 p.m. Adaptive Designs in Clinical Trials—❖ Yu Shen, M. D. Anderson Cancer Center

3:20 p.m. Disc: Sue-Jane Wang, U.S. Food and Drug Administration

3:40 p.m. Floor Discussion

449 CC-4C-4

● A Tribute to Yehuda Vardi—Invited
Memorial, IMS, Section on Physical and Engineering Sciences
Organizer(s): Christopher Genovese, Carnegie Mellon University
Chair(s): Daryl Pregibon, Google Labs

2:05 p.m. Statistical Inverse Problems in Active Network Tomography—❖ Vijay Nair, University of Michigan

2:35 p.m. Fast Functional MRI—❖ Cun-Hui Zhang, Rutgers University

3:05 p.m. Duration Data: Poisson Process and Bias Correction—❖ Zhiliang Ying, Columbia University

3:35 p.m. Floor Discussion

450 CC-607

● New Statistical Methodology for Genomic Applications with Focus on Array CGH and Gene Networks—Invited
ENAR, Biometrics Section, WNAR
Organizer(s): Jeffrey S. Morris, M. D. Anderson Cancer Center
Chair(s): Jeffrey S. Morris, M. D. Anderson Cancer Center

2:05 p.m. A Bayesian Hierarchical Model for Integrating Biological Data—❖ Shane Jensen, The Wharton School of the University of Pennsylvania

2:35 p.m. A Statistics Method for Array CGH Analysis—❖ Pei Wang, Fred Hutchinson Cancer Research Center

3:05 p.m. On Detecting Chromosomal Aberrations Using Copy Number Data—Xuesong Yu, University of Washington; Tim Randolph, University of Washington; Hua Tang, Fred Hutchinson Cancer Research Center; ❖ Li Hsu, Fred Hutchinson Cancer Research Center

3:35 p.m. Floor Discussion

451 CC-608

● The Role of Administrative Records in 21st-Century Surveys and Censuses—Invited
Social Statistics Section, Section on Health Policy Statistics
Organizer(s): Ronald Prevost, U.S. Census Bureau
Chair(s): Lisa Blumerman, U.S. Census Bureau

2:05 p.m. Methods and File Acquisitions Supporting the Expanded Use of Administrative Records—❖ Dean Resnick, U.S. Census Bureau

2:25 p.m. Administrative Records and Survey Data Reuse: a Muse on Their Future—❖ Ronald Prevost, U.S. Census Bureau

2:45 p.m. Why Are Survey Counts of Medicaid Enrollees Lower Than Administrative Enrollment Counts?—❖ Michael Davern, University of Minnesota; David Baugh, Centers for Medicare and Medicaid Services; Christine Cox, National Center for Health Statistics; Kim Lochner, National Center for Health Statistics; Jacob Klerman, RAND Corporation

3:05 p.m. Combining Social Program Administrative Data with Census Bureau Survey Data—❖ Robert Goerge, The University of Chicago

3:25 p.m. Disc: Joel Cohen, Agency for Healthcare Research

3:45 p.m. Floor Discussion

452 CC-612

Using Empirical Likelihood Methods in Survey Sampling—Invited
Section on Survey Research Methods, Section on Nonparametric Statistics
Organizer(s): Phillip S. Kott, National Agricultural Statistics Service
Chair(s): Charles R. Perry, National Agricultural Statistics Service

2:05 p.m. Empirical Likelihood Inference from Sample Survey Data—❖ Jon N. K. Rao, Carleton University; Changbao Wu, University of Waterloo
2:30 p.m. Variance Estimation for Empirical Likelihood Calibration Estimators in Unequal Probability Sampling— Jae-kwang Kim, Yonsei University

2:55 p.m. Empirical Likelihood Methods for Raking in Complex Surveys— Randy R. Sitter, Simon Fraser University; Changbao Wu, University of Waterloo

3:20 p.m. Disc: Phillip S. Kott, National Agricultural Statistics Service

3:40 p.m. Floor Discussion

453 CC-201

Advanced Statistical Methods in Psychological Research—Invited
Section on Bayesian Statistical Science, Biometrics Section, ENAR
Organizer(s): Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia
Chair(s): Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia

2:05 p.m. Combining Speed and Accuracy To Assess Error-Free Cognitive Processes— Mark Glickman, Boston University

2:30 p.m. Long-Range Trends and Short-Range Dependencies in Response Time Data— Mario Peruggia, The Ohio State University; Peter F. Craigmille, The Ohio State University; Trisha Van Zandt, The Ohio State University

2:55 p.m. Hierarchical Bayesian Methods for Models of Memory Processes— Paul Speckman, University of Missouri-Columbia; Jeff Rouder, University of Missouri-Columbia; Dongchu Sun, Virginia Polytechnic Institute and State University/University of Missouri-Columbia; Jun Lu, American University

3:20 p.m. Disc: Jay Myung, The Ohio State University

3:45 p.m. Floor Discussion

454 CC-401

A Statistician’s Summer Reading List: Modern Topics To Check Out—Invited
Section on Statistical Education, Section on Teaching Statistics in the Health Sciences
Organizer(s): Paul Roback, St. Olaf College
Chair(s): Paul Roback, St. Olaf College

2:05 p.m. Analyzing DNA Microarrays with Undergraduate Statisticians— Johanna Hardin, Pomona College; Laura Hoopes, Pomona College; Ryan Murphy, Pomona College

2:30 p.m. An Introduction to Incomplete Data Regression Methods Used in Practice— Nicholas J. Horton, Smith College; Ken P. Kleinman, Harvard Medical School

2:55 p.m. A Data Mining Reading List— Richard De Veaux, Williams College

3:20 p.m. Introducing Bayes in a First Statistics Course— James Albert, Bowling Green State University

3:45 p.m. Floor Discussion

455 CC-618

Recent Advances in Brain Imaging—Topic-Contributed
Biometrics Section, Section on Nonparametric Statistics, ENAR
Organizer(s): Daniel Rowe, Medical College of Wisconsin
Chair(s): Daniel Rowe, Medical College of Wisconsin

2:05 p.m. Modeling State-Related fMRI Activity Using Change Point Theory— Martin A. Lindquist, Columbia University; Tor D. Wager, Columbia University

2:25 p.m. Wild Bootstrap for Functional Magnetic Resonance Imaging Data— Hongtu Zhu, Columbia University/New York State Psychiatric Institute; Bradley S. Peterson, Columbia University/New York State Psychiatric Institute

2:45 p.m. Predicting Post-Treatment Brain Activity Using a Bayesian Hierarchical Model— F. DuBois Bowman, Emory University; Ying Guo, Emory University

3:05 p.m. Power Calculations for Group fMRI Studies Accounting for Arbitrary Design and Temporal Autocorrelation— Jeanette Mumford, University of Michigan; Thomas Nichols, University of Michigan

3:25 p.m. New Kernel Method on Unit Sphere and Its Application to Brain Imaging— Moo Chung, University of Wisconsin-Madison

3:45 p.m. Floor Discussion
456  CC-614
Measuring, Monitoring, and Evaluating Internal Revenue Service Data—Topic-Contributed
Section on Government Statistics
Organizer(s): Kevin Cecco, Internal Revenue Service
Chair(s): Thomas Petska, Internal Revenue Service
2:05 p.m. Monitoring SOI Samples—Joseph Koshansky, Internal Revenue Service
2:25 p.m. Measuring Nonsampling Error in Exempt Organization Business Income Tax Data—Tamara Rib, Internal Revenue Service
2:45 p.m. Customer Satisfaction Initiatives at IRS's Statistics of Income: Using Surveys To Improve Customer Service—Ruth Schwartz, Internal Revenue Service; Beth Kilss, Internal Revenue Service
3:05 p.m. Performance Measures within the Statistics of Income Division—Kevin Cecco, Internal Revenue Service
3:45 p.m. Floor Discussion

457  CC-308
Visualization of Large Datasets—Topic-Contributed
Section on Statistical Graphics, Section on Statisticians in Defense and National Security
Organizer(s): Simon Urbanek, AT&T Labs-Research
Chair(s): Deborah F. Swayne, AT&T Labs-Research
2:05 p.m. Tours of Large Multivariate Data—Dianne Cook, Iowa State University
2:25 p.m. Visualization of Features in Curve Estimates and Application to Genetic Loci Mapping—Myung Hee Lee, The University of North Carolina at Chapel Hill; Ivan Rusyn, The University of North Carolina at Chapel Hill; David Threadgill, The University of North Carolina at Chapel Hill; J. Stephen Marron, The University of North Carolina at Chapel Hill
2:45 p.m. Upscaling Statistical Graphics—Martin Theus, University of Augsburg
3:05 p.m. Visualization of Statistical Models on a Billion Cases—Graham Wills, SPSS Inc.
3:25 p.m. Disc: Antony Unwin, Universität Augsburg
3:45 p.m. Floor Discussion
Ann O’Leary, Centers for Disease Control and Prevention; Jeffrey Parsons, City University of New York-Hunter College; Cynthia Gomez, University of California, San Francisco

2:25 p.m. **Are Higher Levels of Multilevel (Hierarchical) Models Necessary? Application to High-Risk Sexual Behavior Data** — DeMarc Hickson, Emory University/Centers for Disease Control and Prevention; Lance Waller, Emory University; Lillian Lin, Centers for Disease Control and Prevention

2:45 p.m. **How Good Is Good Enough? An Investigation of the Effect of Uncertainty in Survey Parameters on Estimates of HIV Prevalence, Guyana 2004** — Maxine Denniston, Centers for Disease Control and Prevention; Nicole Seguy, Centers for Disease Control and Prevention; Wolfgang Hladik, Centers for Disease Control and Prevention

3:05 p.m. **A Multiple-Recapture Approach When a Unique Identifier Is Not Available** — Ruiguang Song, Centers for Disease Control and Prevention; H. Irene Hall, Centers for Disease Control and Prevention; John Gerstle, Centers for Disease Control and Prevention; Lisa Lee, Centers for Disease Control and Prevention

3:25 p.m. **Floor Discussion**

460 CC-602

**Statistical Applications in Water Quality and Monitoring** — Organizer(s): Keying Ye, The University of Texas at San Antonio; Chair(s): Ilya Lipkovich, Eli Lilly and Company

2:05 p.m. **Clustering Using Stressor-Response Relationships** — Samantha C. Prins, Virginia Polytechnic Institute and State University; Eric P. Smith, Virginia Polytechnic Institute and State University

2:25 p.m. **Composite Sampling for Environmental Variables** — Sylvia Esterby, The University of British Columbia; Abdel H. El-Shaarawi, National Water Research Institute

2:45 p.m. **Modified Power Priors with Multiple Historical Datasets in Water Quality Evaluation** — Yuyan Duan, Bristol-Myers Squibb Company; Keying Ye, The University of Texas at San Antonio; Eric P. Smith, Virginia Polytechnic Institute and State University

3:05 p.m. **Model-Based Clustering in a Brook Trout Classification Study within the Eastern United States** — Huizi Zhang, Virginia Polytechnic Institute and State University; Samantha C. Prins, Virginia Polytechnic Institute and State University; Eric P. Smith, Virginia Polytechnic Institute and State University

3:25 p.m. **Nonparametric Harmonic Regression for Estuarine Water Quality Data** — Melanie Autin, University of South Carolina; Don Edwards, University of South Carolina

3:45 p.m. **Floor Discussion**
462  CC-609  

Reducing the Risk of Data Disclosure through Swapping and Other Masking Procedures—Topic-Contributed  
Section on Survey Research Methods, Section on Statisticians in Defense and National Security  
Organizer(s): Thomas Krenzke, Westat  
Chair(s): Leyla Mohadjer, Westat  

2:05 p.m.  Reducing the Risk of Data Disclosure through Area Masking: Limiting Biases in Variance Estimation—David Inho Park, Westat; Sylvia Dohrmann, Westat; Jill Montaquila, Westat; Leyla Mohadjer, Westat; Lester R. Curtin, Centers for Disease Control and Prevention  

2:45 p.m.  Tactics for Reducing the Risk of Disclosure Using the NCES DataSwap Software—Thomas Krenzke, Westat; Stephen E. Roey, Westat; Sylvia Dohrmann, Westat; Leyla Mohadjer, Westat; Wen-Chau Haung, Westat; Steve Kaufman, Retired; Marilyn Seastrom, National Center for Education Statistics  

3:05 p.m.  Combinations of SDC Methods for Numerical Microdata—Anna Oganian, National Institute of Statistical Sciences; Alan Karr, National Institute of Statistical Sciences  

3:25 p.m.  Disc: Jerome Reiter, Duke University  

3:45 p.m.  Floor Discussion  

Regular Contributed Sessions  
2:00 p.m.—3:50 p.m.  

464  CC-616  

Unit Nonresponse in Surveys IV—Contributed  
Section on Survey Research Methods  
Chair(s): Christopher Johnson, Centers for Disease Control and Prevention  

2:05 p.m.  Evaluation of Using a Model-Assisted Sampling Paradigm versus a Traditional Sampling Paradigm in a Nationally Representative Establishment Survey—Marcus Berzofsky, RTI International; Brandon Welch, RTI International; Rick L. Williams, RTI International; Paul Biemer, RTI International  

3:05 p.m.  Estimation of Attrition Biases in SIPP—Eric Slud, U.S. Census Bureau; Leroy Bailey, U.S. Census Bureau  

3:20 p.m.  Subsampling Nonrespondents: Issues of Calculating Response Rates—Sonya

3:35 p.m. **Physician Survey Response Methods Research**
   - Catharine Burt, National Center for Health Statistics; David Woodwell, National Center for Health Statistics

**466**

**Studies in Air Quality and Pollution—Contributed**
Section on Statistics and the Environment, WNAR
*Chair(s): Jay Ver Hoef, National Marine Mammal Lab*

2:05 p.m. **Comparing CMAQ to Observations**
   - Li Chen, The University of Chicago; Michael L. Stein, The University of Chicago

2:20 p.m. **A Case Study in Estimating Percentage Detection Biases along a Recorded Ozone Profile**
   - Wendy Meiring, University of California, Santa Barbara

2:35 p.m. **Statistical Conditional Simulation of a Multiresolution Numerical Air Quality Model**
   - Xiaofeng Shao, The University of Chicago; Michael L. Stein, The University of Chicago

2:50 p.m. **New Classes of Asymmetric Spatial-Temporal Covariance Models**
   - Man Sik Park, Colorado State University

3:05 p.m. **Multivariate Spatio-Temporal Model for Speciated Fine Particle Matter**
   - Jungsoon Choi, North Carolina State University; Montserrat Fuentes, North Carolina State University; Brian Reich, North Carolina State University

3:20 p.m. **Fast and Flexible Statistical Techniques for the Analysis of Space-Time Data with Complex Structures**
   - Dana Draghicescu, City University of New York-Hunter College; Michael Porter, City University of New York

3:35 p.m. **Statistical Challenges in Comparisons ofMeasured Indoor and Outdoor Exposures in an Urban Setting**
   - Sorina Eftim, The Johns Hopkins Bloomberg School of Public Health; Alison Geyh, The Johns Hopkins Bloomberg School of Public Health; Patrick Breyssse, The Johns Hopkins Bloomberg School of Public Health

**467**

**Quality Measures for Human Populations—Contributed**
Social Statistics Section, Section on Health Policy Statistics
*Chair(s): Kelly H. Zou, Harvard Medical School*

2:05 p.m. **Individuals with Disabilities: How They Impact Research**
   - Larry Featherston, University of Arkansas

</tr>
</thead>
<tbody>
<tr>
<td>2:20 p.m.</td>
<td>Statistical Methodology for Longitudinal Social Network Data</td>
<td>Anton Westveld, University of Washington; Peter Hoff, University of Washington</td>
</tr>
<tr>
<td>2:35 p.m.</td>
<td>Testing for Differential Responses in a Multiple Category Scale: a Case Study on Self-Rated Health among Foreign- and Native-Born Asian Americans</td>
<td>Elena Erosheva, University of Washington; Emily C. Walton, University of Washington; David T. Takeuchi, University of Washington</td>
</tr>
<tr>
<td>2:50 p.m.</td>
<td>Quality Management at the National Center for Health Statistics (NCHS)</td>
<td>Kenneth Harris, National Center for Health Statistics</td>
</tr>
<tr>
<td>3:05 p.m.</td>
<td>Achieving Clinical Satisfaction with the Desirability Function</td>
<td>Terrence Murphy, Yale University</td>
</tr>
<tr>
<td>3:35 p.m.</td>
<td>Multilevel Structural Equation Model for Ordinal Responses</td>
<td>Sophia Rabe-Hesketh, University of California, Berkeley; Xiaohui Zheng, University of California, Berkeley</td>
</tr>
<tr>
<td>2:05 p.m.</td>
<td>New Tests for Joint Hypothesis of a Unit Root When There Is a Break in the Innovation Variance</td>
<td>Amit Sen, Xavier University</td>
</tr>
<tr>
<td>2:20 p.m.</td>
<td>Easily Implemented Confidence Intervals and Hypothesis Tests for Sharpe Ratios under General Conditions</td>
<td>J. D. Opdyke, DataMineIt</td>
</tr>
<tr>
<td>2:35 p.m.</td>
<td>Parameters Estimation and Bias Corrections for Diffusion Processes</td>
<td>Chengyong Tang, Iowa State University; Song X. Chen, Iowa State University</td>
</tr>
<tr>
<td>2:50 p.m.</td>
<td>New Tests for Endogeneity in a Simultaneous Equation System with Discrete Endogenous Variable</td>
<td>Xu Cao, University of Missouri-Rolla; V. A. R. Samaranayake, University of Missouri-Rolla</td>
</tr>
<tr>
<td>3:05 p.m.</td>
<td>Causality Tests in Cointegrated Systems and Temporal Aggregation of Multivariate Autoregressive Moving Average Processes</td>
<td>Ceylan Yozgatgil, Temple University; William W. S. Wei, Temple University</td>
</tr>
<tr>
<td>3:20 p.m.</td>
<td>LAD Estimation of ARFIMA-GARCH Models</td>
<td>Wai K. Li, The University of Hong Kong; Guodong Li, The University of Hong Kong</td>
</tr>
<tr>
<td>3:35 p.m.</td>
<td>A Note on the Inequality Constraints for the GARCH Models</td>
<td>Henghsiu Tsai, Academia Sinica; Kung-Sik Chan, The University of Iowa</td>
</tr>
<tr>
<td>2:05 p.m.</td>
<td>Simultaneous Test for Superiority and Noninferiority Hypotheses in Active Controlled Clinical Trials</td>
<td>Joanne Zhang, Center for Drug Evaluation and Research; Yi Tsong, U.S. Food and Drug Administration</td>
</tr>
<tr>
<td>2:35 p.m.</td>
<td>Likelihood Ratio Tests for Equivalence Hypotheses</td>
<td>Shun-Yi Chen, Tamkang University; Ching-Feng Hsu, Tamkang University</td>
</tr>
<tr>
<td>2:50 p.m.</td>
<td>Simultaneous Testing of Noninferiority and Superiority Increases the False Discovery Rate</td>
<td>Tie-Hua Ng, U.S. Food and Drug Administration</td>
</tr>
<tr>
<td>3:05 p.m.</td>
<td>New Tests for Null Hypotheses of Nonunity Relative Risk</td>
<td>Kallappa Koti, U.S. Food and Drug Administration</td>
</tr>
<tr>
<td>3:20 p.m.</td>
<td>Assessing the Superiority of a Combination Drug</td>
<td>Jianjun Li, Merck Research Laboratories; Steven Snapinn, Amgen Inc.; Guoyong Jiang, Cephalon, Inc.</td>
</tr>
<tr>
<td>3:35 p.m.</td>
<td>To Permute or Not Permute</td>
<td>Haiyan Xu, Johnson &amp; Johnson Pharmaceutical R&amp;D; Jason Hsu, The Ohio State University; Yifan Huang, H. Lee Moffitt Cancer Center &amp; Research Institute; Violeta Calian, University of Iceland</td>
</tr>

470 CC-619

Semiparametric Methods—Contributed
Biometrics Section, Section on Nonparametric Statistics, ENAR
Chair(s): Sally Hunsberger, National Cancer Institute

2:05 p.m. The Efficiency of Multivariate Pseudo-Likelihood Estimation—Park Bum Hee, Hankuk University of Foreign Studies; Park Heungsun, Hankuk University of Foreign Studies

2:20 p.m. Confidence Intervals Based on Non-Smooth Estimating Equations for Longitudinal Data Using Markov Chain Marginal Bootstrap—Di Li, University of Illinois at Urbana-Champaign

2:35 p.m. Hierarchical Quasi-Likelihood Approach to Bioavailability and Bioequivalence Analysis—Changchun Xie, McMaster University

2:50 p.m. Analysis of Linear Transformation Models with Covariate Transformations—Chunpeng Fan, University of Wisconsin-Madison; Jason P. Fine, University of Wisconsin-Madison

3:05 p.m. Smoothing Spline ANOVA Model for Bivariate Bernoulli Outcome—Hyonho Chun, University of Wisconsin-Madison

3:20 p.m. Hierarchical Quasi-Likelihood Approach to Bioavailability and Bioequivalence Analysis—Changchun Xie, McMaster University

3:35 p.m. Floor Discussion

471 CC-620

Inference and Models for Censored Data—Contributed
Biometrics Section, ENAR
Chair(s): Petra Buzkova, The University of North Carolina at Chapel Hill

2:05 p.m. Statistical Analysis of Survival Data under Informative Truncation—Shu-Hui Chang, National Taiwan University

2:20 p.m. Medical Cost Estimation under Dependent Censoring—Wenqin Pan, Duke University; Donglin Zeng, The University of North Carolina at Chapel Hill

2:35 p.m. A General Semiparametric Transformation Model for Survival Data—Hao Liu, University of California, Davis; Alexander Tsodikov, University of California, Davis

2:50 p.m. Estimation of a Survival Curve with Unlinked Entry and Failure Times—Yujun Wu, University of Medicine & Dentistry of New Jersey; Weichung J. Shih, University of Medicine & Dentistry of New Jersey; Dirk Moore, University of Medicine & Dentistry of New Jersey

3:05 p.m. Comorbidity through the Life Span—John Dixon, Florida State University; Eric Chicken, Florida State University; Myles Hollander, Florida State University; Dan McGee, Florida State University

3:20 p.m. Goodness-of-Fit Tests for Left-Truncated and Right-Censored Data—Yi-Ting Huang, National Taipei University

3:35 p.m. A Goodness-of-Fit Test for Copula Models—Antai Wang, Georgetown University

472 CC-2B

Osteoporosis, Contraceptive, and Vaccine Trials—Contributed
Biopharmaceutical Section, Biometrics Section, ENAR
Chair(s): Margaret Minkwitz, AstraZeneca Pharmaceuticals

2:20 p.m. Quantifying the Effect of the Surrogate Marker by Information Gain—Yongming Qu, Eli Lilly and Company; Michael Case, Eli Lilly and Company

2:35 p.m. Assessing Learning Effect and Nonrandom Dropout in a Contraceptive Device Trial—Pai-Lien Chen, Family Health International

2:50 p.m. An Improved Exact Method for the Estimation and Testing of a Rate Ratio—William W. B. Wang, Merck Research Laboratories; Ivan Chan, Merck & Co., Inc.

3:05 p.m. Utilizing Statistical Models To Predict the Duration of Protection of Vaccines—Liwen Xi, Merck & Co., Inc.

3:20 p.m. A Statistical Framework for Quantile Equivalence Clinical Trials with Application to Pharmacokinetic Studies That Bridge from HIV-Infected Adults to Children—Lixia Pei, Harvard University; Michael Hughes, Harvard University
3:35 p.m. The Use of an Internal Unblinded Statistician with a Data-Monitoring Committee
David Radley, Merck & Co., Inc.; Gregory Golm, Merck & Co., Inc.

473 CC-3A

Oncology Trials—Contributed
Biopharmaceutical Section, Biometrics Section, ENAR
Chair(s): David Manner, Eli Lilly and Company

2:05 p.m. Evaluating the Quality Reporting of Clinical Trials in Primary Treatment of Brain Tumors
Lehana Thabane, McMaster University; Rose Lai, Columbia University; Rong R. Rachel, The University of British Columbia; Michael Fraumeni, Juravinski Cancer Centre

2:20 p.m. Predicting Malignant Renal Lesions by Using Preoperative Color Doppler Ultrasoundography: Building a Nomogram
Alexia Iasonos, Memorial Sloan-Kettering Cancer Center; Ganesh V. Raj, Memorial Sloan-Kettering Cancer Center; Paul Russo, Memorial Sloan-Kettering Cancer Center

2:35 p.m. Statistical Properties of a Modified Accelerated Design for Phase I Cancer Clinical Trials
Weili He, Merck & Co., Inc.; Jun Liu, Rutgers University; Hui Quan, sanofi-aventis

2:50 p.m. Using Marginal Structural Model To Adjust for Post-Discontinuation Chemotherapy in Cancer Clinical Trials
Yanping Wang, Eli Lilly and Company; Jim Symanowski, Eli Lilly and Company

3:05 p.m. On Dose Escalation Rules in Phase I Cancer Clinical Trials
Susan Li, Centocor R&D, Inc.

3:20 p.m. Identifying Patients with Newly Diagnosed, Histologically Proven; Untreated; Symptomatic Stage I, II, or III Myeloma Who May Benefit from Dexamethasone
Keyue Ding, Queen’s University

3:35 p.m. A Statistical Method To Integrate Independent Review and Investigator Review in Clinical Cancer Trial
Xiaolong Luo, Johnson & Johnson Pharmaceutical R&D

474 CC-601

Network Analysis and Spatial Applications—Contributed
Section on Physical and Engineering Sciences
Chair(s): Dave Higdon, Los Alamos National Laboratory

2:05 p.m. Dynamic Origin-Destination Matrix Estimation

475 CC-309

Dimension Reduction and Image Analysis—Contributed
Section on Statistical Computing, Section on Statistical Graphics
Chair(s): Ranjan Maitra, Iowa State University

2:05 p.m. Assessment of Influential Observations Using Alpha Factor Analysis
Zenaida F. Mateo, University of Manitoba; Yutaka Tanaka, Nanzan University

2:20 p.m. Factor Analysis for Multiattribute Ranked Data
Philip L. H. Yu, The University of Hong Kong; Wai Ming Wan, The University of Hong Kong

2:35 p.m. Sufficient Dimension Reduction, Regardless of (n, p) Relation
Lexin Li, North Carolina State University
<table>

476 CC-205
The Practice of Statistical Consulting: Study Design and Sample Size—Contributed
Section on Statistical Consulting
Chair(s): Harold Dyck, California State University

2:05 p.m. | The Joys (and Perils) of Professional Statistical Consulting—Nestor Rohowsky, IDCS, Inc. |
2:20 p.m. | Impact of Effect Size, Sample Size, and Crossover Percent on Intention-to-Treat (ITT) Analysis: Do Subjects Need To Stay in the Group They Were Assigned?—Thomas Wasser, Lehigh Valley Hospital; Christopher S. Hollenbeak, The Pennsylvania State University; Stephen Matchett, Lehigh Valley Hospital |
2:35 p.m. | Comparison of Effect Size, Power, and Type I Error Rate in Simulated Efficacy and Effectiveness Trials—Mary Z. Mays, Arizona State University; Jan Jirsak, University of Arizona |
2:50 p.m. | Reporting Significant Results for a Large Sample Study—Gloria Caldito, LSU Health Sciences Center |
3:05 p.m. | Uncontrolled Variation in Multistage Experiments—T. B. Bailey, Iowa State University |

477 CC-307
Dimension Reduction Methods—Contributed
Section on Nonparametric Statistics
Chair(s): Ann Kalinowski, WIHS UCSF

2:05 p.m. | Sliced Inverse Moment Regression Using Weighted Chi-Squared Tests for Dimension Reduction—Jie Yang, The University of Chicago; Zhishen Ye, Eli Lilly and Company |
2:20 p.m. | Selecting Tuning Parameters in Dimension Reduction Methods in Regression—Peng Zeng, Auburn University |
2:35 p.m. | Projection-Directed Nonparametric Omnibus Test for the Multivariate Multisample Problem—Xiaobin Yuan, St. Jude Children's Research Hospital; Cheng Cheng, St. Jude Children's Research Hospital |
2:50 p.m. | Aggregation of Nonparametric Estimators for Volatility Matrix—Yingying Fan, Princeton University |
3:05 p.m. | Dimensionality Reduction of High-Dimensional Tables—Siamak Noorbaloochi, VAMC, University of Minnesota; David Nelson, VAMC, University of Minnesota; Joe Grill, VAMC, Minneapolis |
3:20 p.m. | Statistical Inference of Distributions on Manifold—Wanli Min, IBM T. J. Watson Research Center |
3:35 p.m. | Floor Discussion |
**GENERAL PROGRAM SCHEDULE**

**2:05 p.m.** Tree-Based and Bayesian Modeling of Food Web Collapse in the Permian Mass Extinction—Daniel Spitzner, Virginia Polytechnic Institute and State University

**2:20 p.m.** Bayesian Calibration Models for Obsidian Hydration Dating—Andrew Schaffner, California Polytechnic State University, San Luis Obispo

**2:35 p.m.** Bayesian Semiparametric Analysis for a Single-Item Maintenance Optimization—Elmira Popova, The University of Texas at Austin; Paul Damien, The University of Texas at Austin; Timothy Hanson, University of Minnesota

**2:50 p.m.** Bayesian Modeling of the Effect of Four-to-Three-Lane Conversion on the Number of Crashes and Crash Rates for Iowa Roads—Wen Li, Iowa State University; Alicia Carriquiry, Iowa State University

**3:05 p.m.** Bayesian Procrustes Analysis—Athanasios Micheas, University of Missouri-Columbia; Yuqi Pang, University of Missouri-Columbia

**3:20 p.m.** Statistical Analysis of Single-Unit Firing Rate—Sam Behseta, California State University; Robert E. Kass, Carnegie Mellon University

**3:35 p.m.** Floor Discussion

**2:50 p.m.** Comparison of the Income Items from the CPS and Census 2000—Bruce H. Webster, U.S. Census Bureau

**3:05 p.m.** Multiple-Record Applicants in the Analysis of Hiring Disparity—Charles McGhee, U.S. Department of Labor; Marika Litras, Office of Federal Contract Compliance Programs; Michael Sinclair, Office of Federal Contract Compliance Programs

**3:35 p.m.** Estimating Missing Prices in Producer Price Index—Onimissi Sheidu, Bureau of Labor Statistics

**478 CC-400**

**Applied Bayesian Modeling—Contributed**

Section on Bayesian Statistical Science

Chair(s): Dan Spitzner, Virginia Polytechnic Institute and State University

**2:05 p.m.** Tree-Based and Bayesian Modeling of Food Web Collapse in the Permian Mass Extinction—Steve C. Wang, Swarthmore College; Peter D. Roopnarine, California Academy of Sciences; Kenneth D. Angielczyk, University of Bristol

**2:20 p.m.** Bayesian Calibration Models for Obsidian Hydration Dating—Andrew Schaffner, California Polytechnic State University, San Luis Obispo

**2:35 p.m.** Bayesian Semiparametric Analysis for a Single-Item Maintenance Optimization—Elmira Popova, The University of Texas at Austin; Paul Damien, The University of Texas at Austin; Timothy Hanson, University of Minnesota

**2:50 p.m.** Bayesian Modeling of the Effect of Four-to-Three-Lane Conversion on the Number of Crashes and Crash Rates for Iowa Roads—Wen Li, Iowa State University; Alicia Carriquiry, Iowa State University

**3:05 p.m.** Bayesian Procrustes Analysis—Athanasios Micheas, University of Missouri-Columbia; Yuqi Pang, University of Missouri-Columbia

**3:20 p.m.** Statistical Analysis of Single-Unit Firing Rate—Sam Behseta, California State University; Robert E. Kass, Carnegie Mellon University

**3:35 p.m.** Floor Discussion

**479 CC-613**

**Nonresponse Bias and Other Estimation Challenges—Contributed**

Section on Government Statistics

Chair(s): Carolyn Shettle, Westat

**2:05 p.m.** Nonresponse Bias in the Omnibus Household Survey—Promod Chandhok, Bureau of Transportation Statistics

**2:20 p.m.** Nonresponse Bias of Time-Use Measures’ Inter-relationships—John Dixon, Bureau of Labor Statistics

**2:35 p.m.** Using Survival Analysis To Predict Sample Retention Rates—Andy Sadler, Bureau of Labor Statistics

**2:50 p.m.** Comparison of the Income Items from the CPS and Census 2000—Bruce H. Webster, U.S. Census Bureau

**3:05 p.m.** Multiple-Record Applicants in the Analysis of Hiring Disparity—Charles McGhee, U.S. Department of Labor; Marika Litras, Office of Federal Contract Compliance Programs; Michael Sinclair, Office of Federal Contract Compliance Programs

**3:35 p.m.** Estimating Missing Prices in Producer Price Index—Onimissi Sheidu, Bureau of Labor Statistics

#### Archeology, anthropology, humanities

| 01 | A Multivariate Statistical Analysis of Female Empowerment—❖ Janelle Jones, SUMSRI; Adrianne Demski, SUMSRI |

#### General

| 02 | Examination of Structure Coefficient Interpretation in Descriptive Discriminant Analysis: the Three-Group Case—❖ Mercedes Schneider, Ball State University |

| 03 | Computer Literacy of Adolescents in Grades 9 to 12: an Exploratory Study—❖ Matthew Sink, Shoreline Christian High School; Christopher A. Sink, Seattle Pacific University |

| 04 | Partial Least Squares Regression and Its Application in Drug Discovery—❖ Jingjing Chen, Merck & Co., Inc. |

| 05 | Quasi-Probability Distributions Based on the Lagrange Expansions—❖ Shubiao Li, Central Michigan University; Carl Lee, Central Michigan University; Felix Famoye, Central Michigan University |

| 06 | Data Analysis of Virtual Cement Measurements—❖ Adriana Hornikova, National Institute of Standards and Technology; Charles Hagwood, National Institute of Standards and Technology; Hung-kung Liu, National Institute of Standards and Technology; Blaza Toman, National Institute of Standards and Technology; Nien Fan Zhang, National Institute of Standards and Technology; Edward J. Garboczi, National Institute of Standards and Technology; Jeffrey W. Bullard, National Institute of Standards and Technology |

| 07 | Analysis of Number of Components in Mixture Model—❖ Yan Wang, Southern Methodist University; S. Lynne Stokes, Southern Methodist University |

| 08 | The Impact of Erroneous Inclusion and Exclusion of Variables in Multivariate Inference—❖ Youfeng Nie, Sam Houston State University; Cecil Hallum, Sam Houston State University |

| 09 | On Testing about a Construct Mean for Likert-Scale Data—❖ Cherng Ding, National Chiao Tung University; Hsiu-Yu Lee, National Chiao Tung University |

| 10 | Caution When Using Covariate Adjustment in Mixed Effect ANOVA—❖ Zhenxu Ma, Battelle; Paul Feder, Battelle |

| 11 | Estimating a Population Median from a Small Sample—❖ Boris Shulkin, Christy Industries/Magna International; Shlomo Sawilowsky, Wayne State University |

| 12 | On the Use of Heywood Cases for Specification Testing in SEM—❖ Stanislav Kolenikov, University of Missouri-Columbia; Kenneth A. Bollen, The University of North Carolina at Chapel Hill |

#### Linear models, GLMs, parametric methods

| 13 | S-PLUS and R Package for Least Angle Regression—❖ Tim C. Hesterberg, Insightful Corporation |

| 14 | Partially Repeated Measurements—❖ Mitchell Watanik, California State University, East Bay; Erica Wong, California State University, East Bay; David Schlessinger, California State University, East Bay |

| 15 | Selecting the Best Confidence Interval for a Variance Ratio (or Heritability)—❖ Brent Burch, Northern Arizona University |

| 16 | Calculating Power for Generalized Linear Models Using the Wald Test—❖ Jonathan Mahnken, The University of Kansas Medical Center |

| 17 | Confidence Interval Coverage for Four Effect Sizes for Predictor Variables in a Multiple Linear Regression Model—❖ Todd Bodner, Portland State University |

#### Longitudinal data, repeated measurements, cluster data

| 18 | Large-Cluster Asymptotics for GEE: Working Correlation Models—❖ Hyoju Chung, University of Washington; Thomas Lumley, University of Washington |

| 19 | Free SAS/IML® Software for Computing Confidence Limits for Power in the Univariate and Multivariate Approaches to Repeated Measures—❖ Jacqueline Johnson, The University of North Carolina at Chapel Hill; Matthew Gribbin, The University of North Carolina at Chapel Hill; Sola Park, The University of North Carolina at Chapel Hill; Keith E. Muller, The University of North Carolina at Chapel Hill |

| 20 | Goodness-of-Fit Tests for Proportional Odds Model with GEE for Ordinal Categorical Responses—❖ Junxiang Luo, University of Cincinnati; Rakesh Shukla, University of Cincinnati; Qi Zhang, University of Cincinnati |
21 Latent Class Growth Models: an Application—
❖ Maragatha Kuchibhatla, Duke University Medical Center; Gerda Fillenbaum, Duke University Medical Center

23 An Empirical Power Analysis of Hierarchical Multivariate Linear Model under Three Covariance Structures in Longitudinal Data Analysis—❖ Hua Fang, Ohio University; Gordon P. Brooks, Ohio University; Maria L. Rizzo, Ohio University; Robert S. Barcikowski, Ohio University

Probability, mathematical statistics, stochastic processes

24 A General Probability Distribution Using Berman Power Series—❖ Pali Sen, University of North Florida; Richard F. Patterson, University of North Florida

25 A Modified Asymmetric Simes Procedure for Multiple Tests of Significance—❖ Li Deng, New England College of Optometry

Simulation and Monte Carlo methods

26 An Examination of the Utility of Bonferroni Adjustments for Tests of Regression Coefficients—❖ Daniel Mundfrom, University of Northern Colorado; Jamis Perrett, University of Northern Colorado; Jay Schaffer, University of Northern Colorado; Adam Piccone, University of Northern Colorado

Sports, art, entertainment

Incomplete data analysis, imputation methods

28 Statistical Approaches To Analyze Censored Data with Multiple Detection Limits—❖ Wei Zhong, ICON Clinical Research; Linda Levin, University of Cincinnati; Paul Succop, University of Cincinnati; Rakesh Shukla, University of Cincinnati; Jeffrey Welge, University of Cincinnati

Invited Sessions 4:00 p.m.–5:50 p.m.

482 CC-Ballroom 6ABC
COPSS Awards and Fisher Lecture—Invited
Committee of Presidents of Statistics Societies (COPSS), The ASA, ENAR, WNAR, IMS, SSC
Organizer(s): Karen Bandeen-Roche, The Johns Hopkins Bloomberg School of Public Health
Chair(s): Karen Bandeen-Roche, The Johns Hopkins Bloomberg School of Public Health

4:00 p.m. Presentation of Awards—❖ Karen Bandeen-Roche, The Johns Hopkins Bloomberg School of Public Health

4:20 p.m. Recombination and Linkage—❖ Terence P. Speed, University of California, Berkeley

5:35 p.m. Floor Discussion

We’ll See You Next Year for JSM2007
in Salt Lake City, Utah!
VITAL STATISTICS FROM CAMBRIDGE UNIVERSITY PRESS

Principles of Statistical Inference
D. R. Cox
Hardback / List $80.00* / Disc. $64.00
Paperback / List $34.99* / Disc. $27.99

Matched Sampling for Causal Effects
Donald B. Rubin
Hardback / List $90.00* / Disc. $72.00
Paperback / List $39.99* / Disc. $31.99

Bayesian Inference for Gene Expression and Proteomics
Edited by Kim-Anh Do, Peter Müller, and Marina Vannucci
Hardback / List $75.00* / Disc. $60.00

Applied Multilevel Analysis
A Practical Guide for Medical Researchers
Jos W. R. Twisk
Now in Paperback!
Practical Guides in Biostatistics and Epidemiology
Hardback / List $95.00 / Disc. $76.00
Paperback / List $45.00 / Disc. $36.00

Statistics for Real-Life Sample Surveys
Non-Simple-Random Samples and Weighted Data
Sergey Dorofeev and Peter Grant
Hardback / List $99.00 / Disc. $79.20
Paperback / List $45.00 / Disc. $36.00

Introduction to Computer-Intensive Methods of Data Analysis in Biology
Derek Roff
Hardback / List $125.00 / Disc. $100.00
Paperback / List $65.00 / Disc. $52.00

The Cambridge Dictionary of Statistics
Third Edition
B. S. Everitt
Hardback / List $95.00* / Disc. $76.00
Paperback / List $45.00* / Disc. $36.00
