Organization/Company Name _____

Bill to the Attention of: _____

Street Address _____

City/State/Zip _____

Phone _____ Fax _____

❸ REQUIRED information on every email message:

a. Whose name should be **displayed as the sender** of your message—this is not an email address, but identifies the author of the message, either your company or the name of an individual? *Note that the active email for bounces will be noreply@mgilists.net.*

Your email will be: **FROM:** _____

b. What is your SUBJECT line? (Recommended length 35 characters or shorter.)

SUBJECT LINE: _____

c. Remember to include your organization's **complete physical address** on the outbound email message.

❹ **TEST MESSAGE.** MGI and you—as the sender—will receive and *must approve* a test message before the email message is cleared to transmit. Specify one or more email addresses to receive and approve the test message (*Tests go out immediately prior to your selected delivery date. If you will be traveling then, tell us who can approve the test if you are not available.*)

CBrecht@MGILists.com _____ @ _____

Important Note: We will setup and queue your message to accommodate your requested delivery date. Each setup carries a \$100 nonrefundable setup cost; if the email is cancelled after test setup, you will owe the setup fee.

❺ **YOUR REQUESTED EMAIL DELIVERY DATE:** _____

A DIVISION OF MARKETING GENERAL INCORPORATED

We offer some basic guidelines to help improve the deliverability of your message to an email list managed by MGI.

Guidelines Group 1, to help your message avoid being marked as SPAM.

- Avoid using exclamation points (!), dollar signs (\$), and ALL CAPS in the subject line.
- Keep your subject line brief and to the point.
- Avoid using exclamation points (!) and dollar signs (\$) in the email body.
 - Limited usage is okay; avoid repeated usage.
- Avoid SPAM trigger words in the subject line or email content.
 - Examples of these are “free,” “guarantee,” “guaranteed,” “dear,” “50%,” “100%,” “click,” “click here.”
- Use an equal balance of images and text.
- Use alt tags (alternative text tags) on all images.
 - These tags will display if the recipient has disabled images.
 - This will increase the ratio of text-to-images and help SPAM filters determine the email content.
- **Avoid putting text inside images.**
 - *Email clients cannot read text embedded within images, so when an email has little other text it is typically marked as SPAM.*

Guidelines Group 2, to help your message deliver successfully across many email clients in popular use (including Microsoft, Gmail, Hotmail).

- Use standard HTML. Do not use Javascript.
- Use alt tags (alternative text tags) on *all* images. These tags will display if the recipient has disabled images.
- Avoid setting image width or height.
 - Most email programs will only display images in their true size.
 - It is best to include the image height and width settings to keep the email spaced properly when images are disabled.
- Avoid using background images.
 - Most email programs will ignore background images.
 - If you do use background images, be sure to set a default background color.
- Use nested tables for the email layout.
 - CSS is a style sheet language used for defining the formatting of a document. Most cascading style sheets (or CSS) styling will not render correctly.
 - Avoid left and right margin settings. Those settings will be ignored by many email programs.
