

# PIPELINE ORCHESTRATION USING MICROSERVICES

A TICKET TO APP MODERNIZATION

VENITA GLASFURD

WOMEN IN STATISTICS AT DATA SCIENCE

OCTOBER 4TH, 2019

## DATA ENGINEER

DEVELOPS, CONSTRUCTS, TESTS AND MAINTAINS  
ARCHITECTURES FOR  
BIG DATA PIPELINES  
CLEANS, MASSAGES AND ORGANIZES BIG DATA

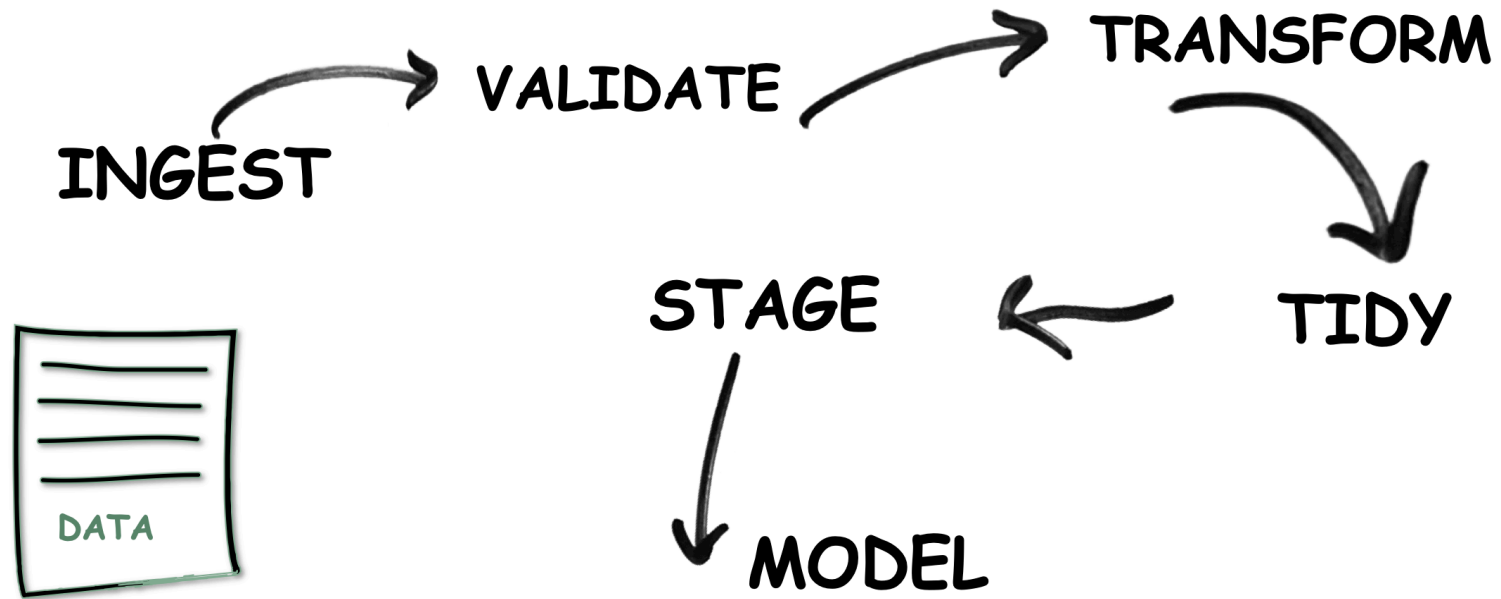

## DATA SCIENTIST

PERFORMS DESCRIPTIVE STATISTICS AND  
ANALYSIS TO DEVELOP MODERN INSIGHTS,  
BUILD MODELS AND SOLVE A BUSINESS NEED

# DATA PIPELINE

# AGENDA

MANAGING DATA PIPELINES IN AN AI SOLUTION

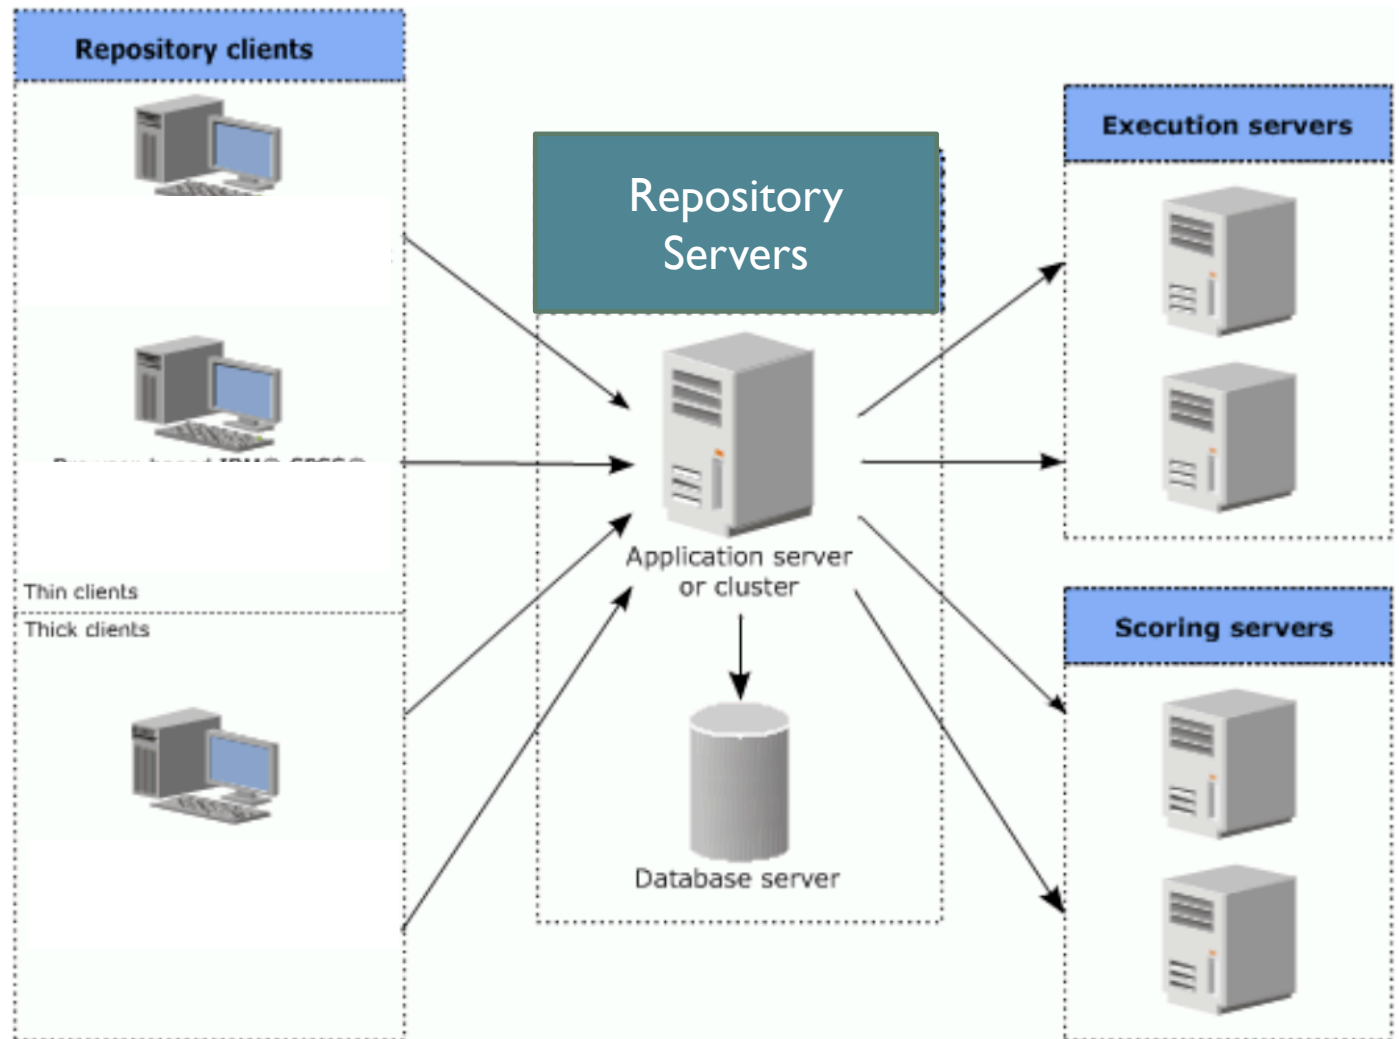

PROBLEMS FACED WITH MONOLITHIC TOOL USED TO  
MANAGE OUR PIPELINE

MICROSERVICES INSTEAD OF MONOLITHIC  
ARCHITECTURES

LEARNINGS THAT UNFOLDED IN OUR JOURNEY AND  
ROLL OUT STRATEGY

# A MONOLITH PIPELINE ORCHESTRATOR LIKE THIS...

ROGUE PROCESSES

UNRESPONSIVENESS

FREQUENT OUTAGES

CUMBERSOME RE-STARTS

# CHOOSING A PIPELINE ORCHESTRATOR FOR OUR BIG DATA PIPELINE

LET'S WRITE  
OUR OWN  
PIPELINE  
MANAGER

USE  
MICROSERVICES

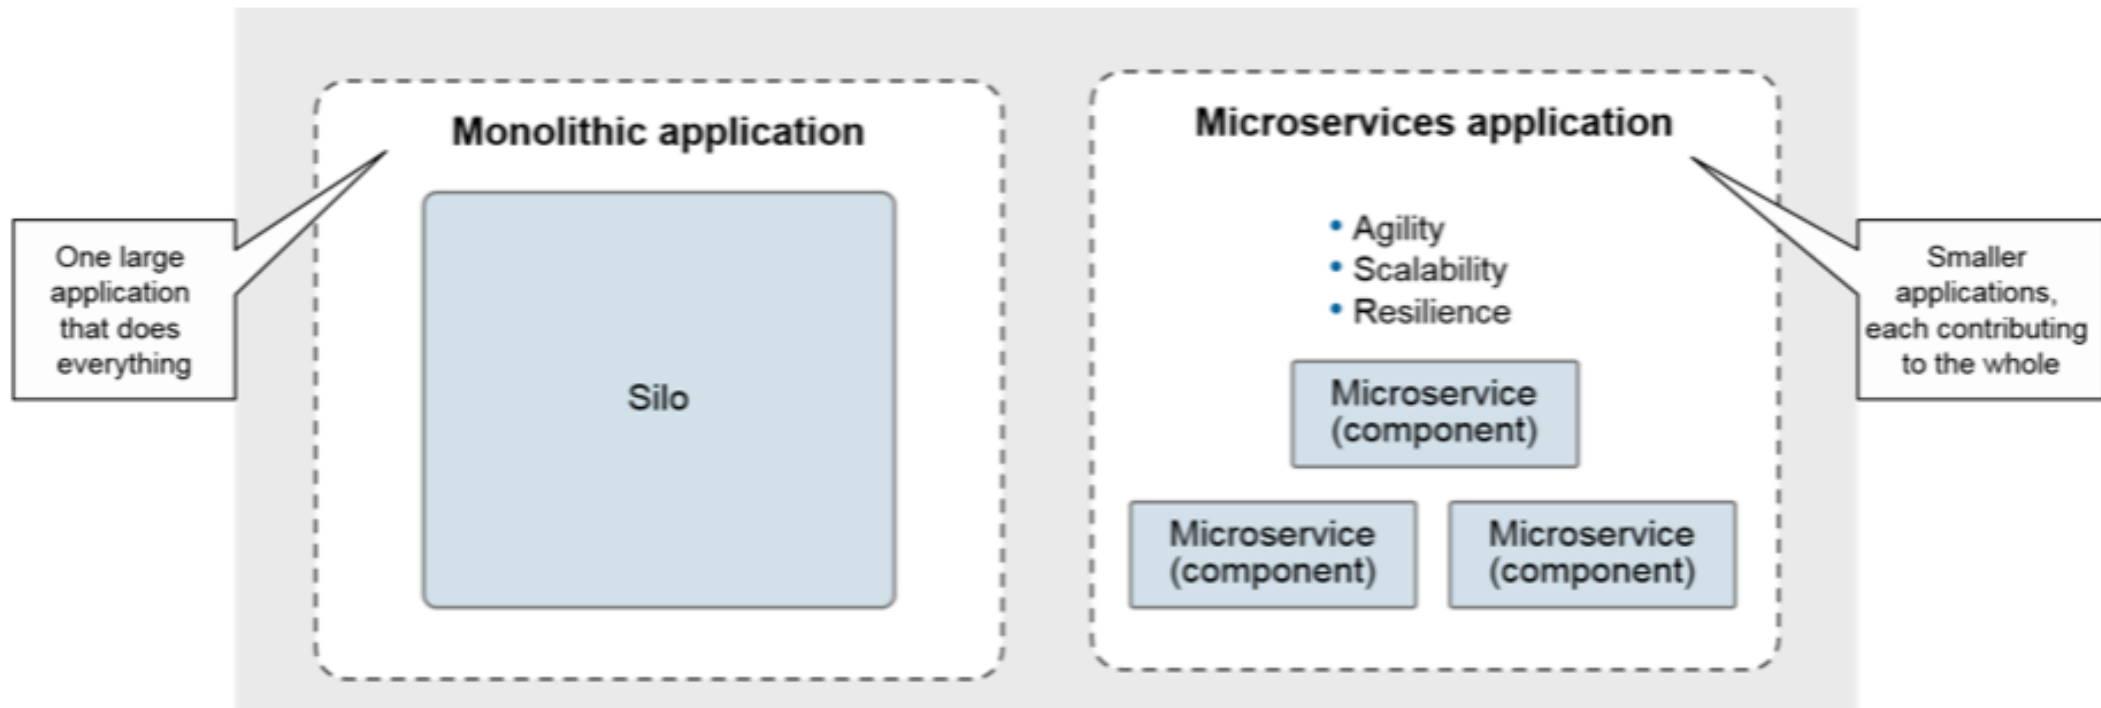

# MICROSERVICES

- Microservices are not new

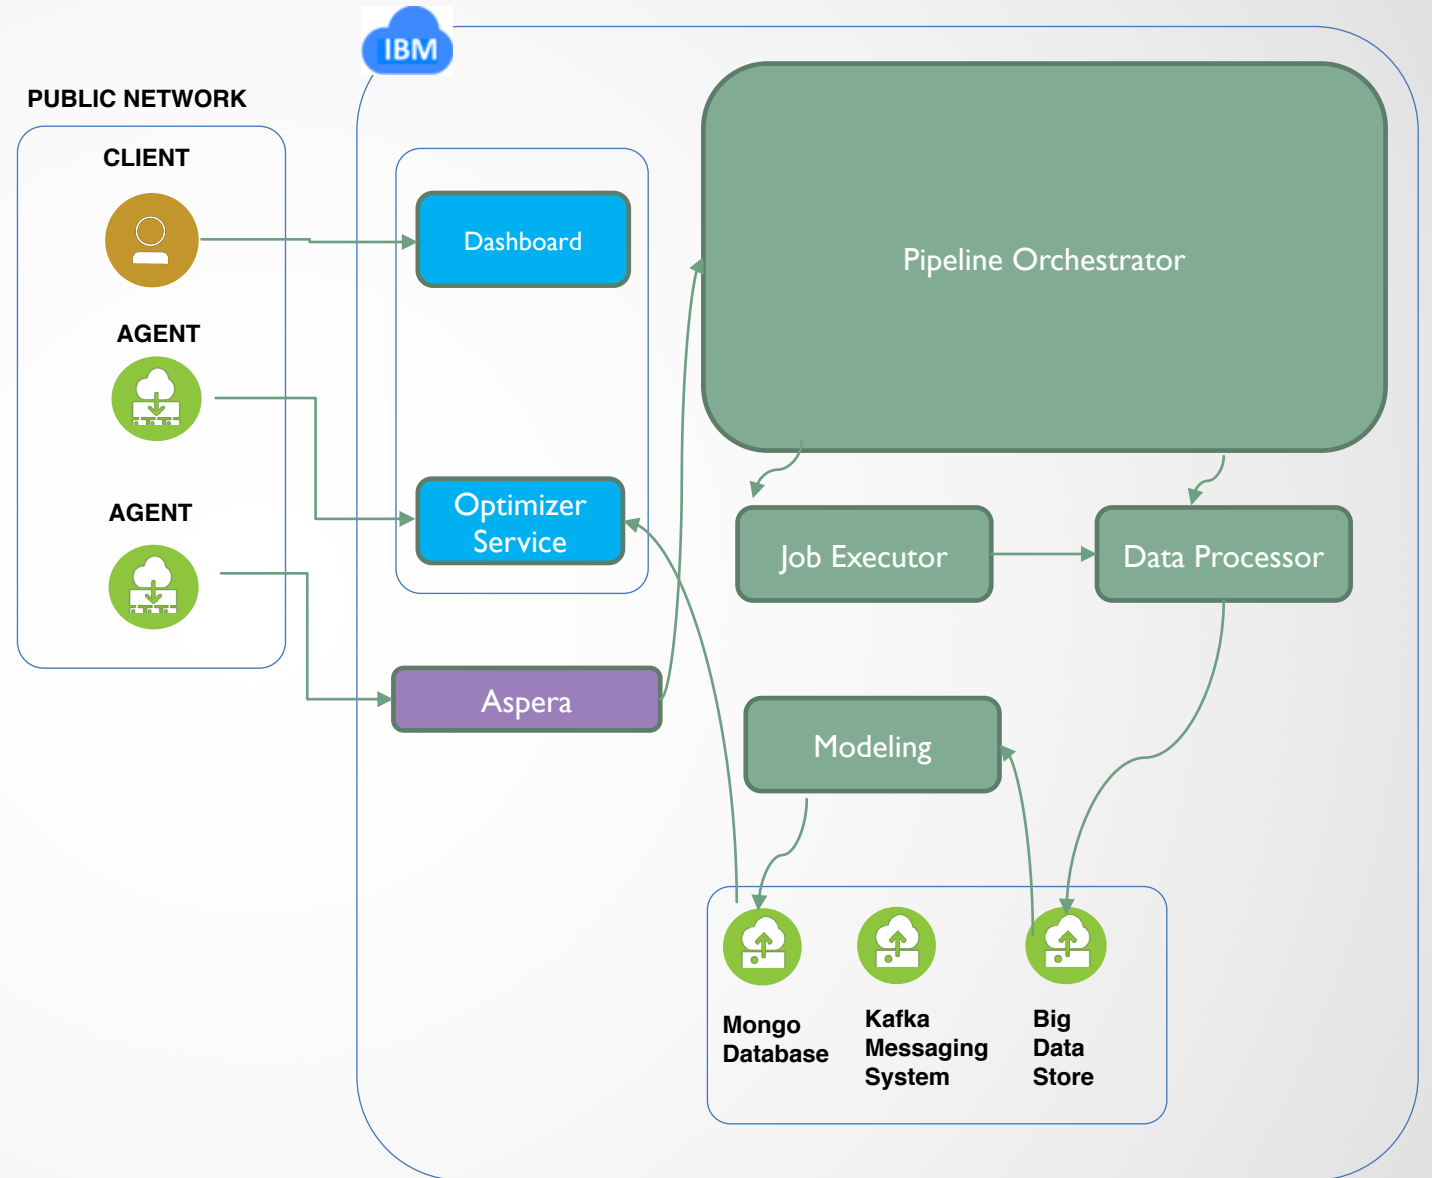

# MICROSERVICES TO THE RESCUE

Microservices is breaking down one large objective into its parts, and having those parts be accomplished independently.

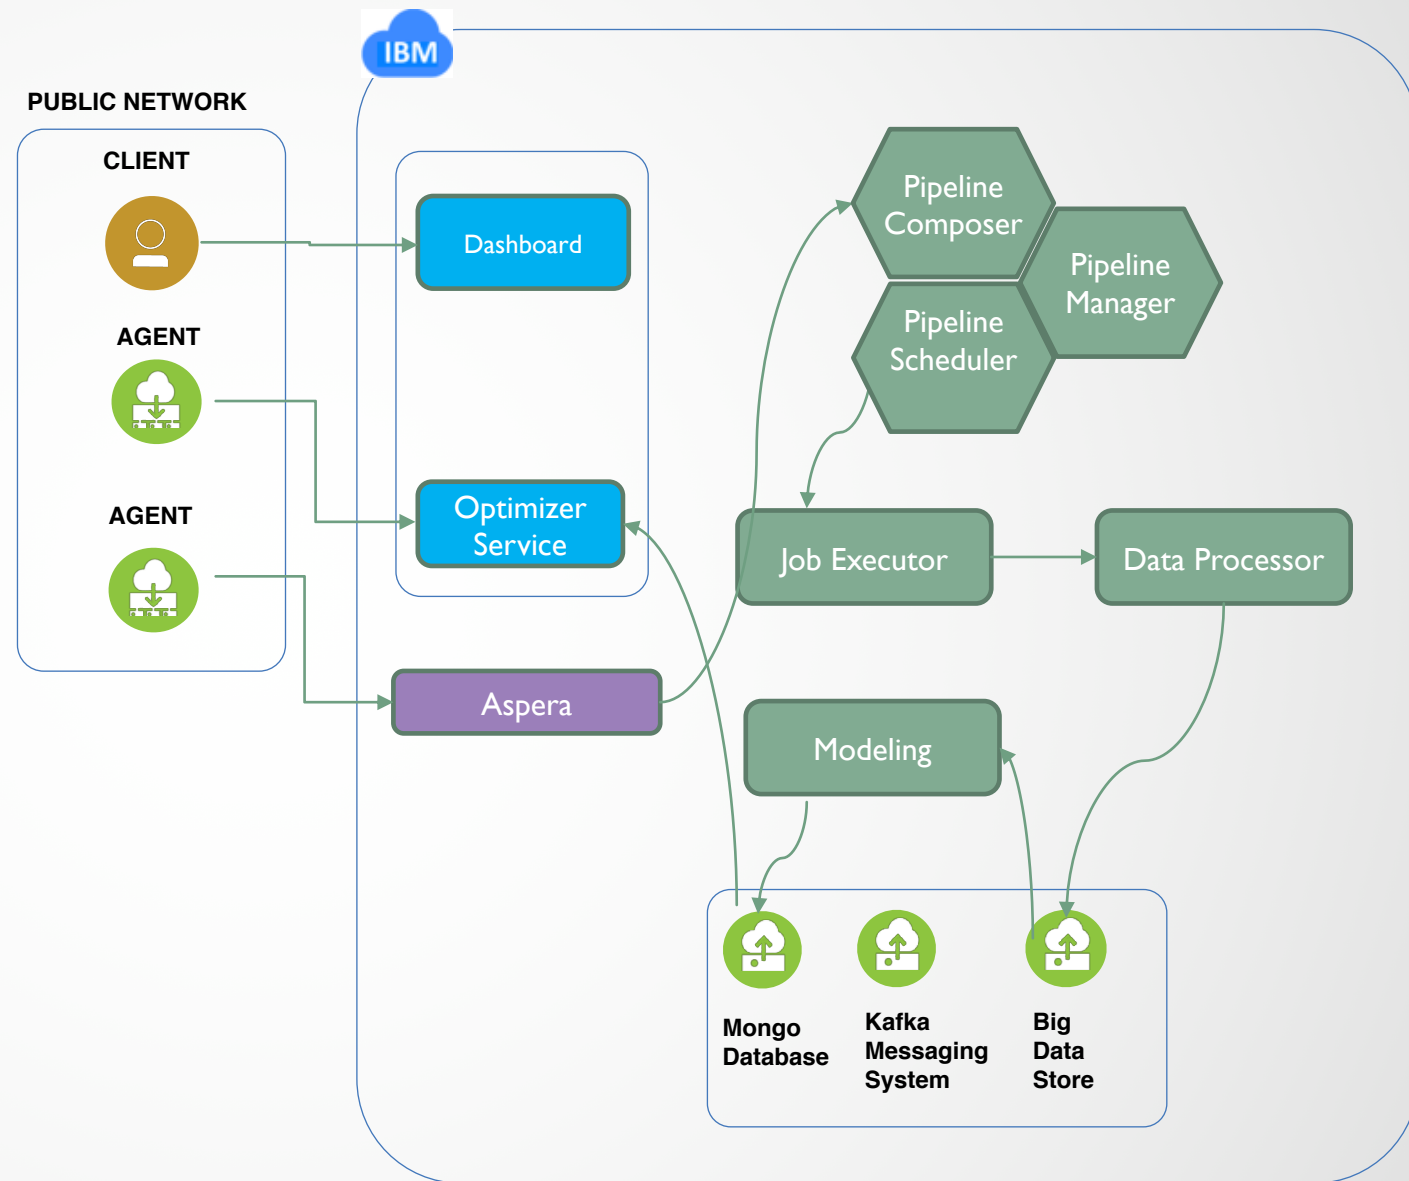

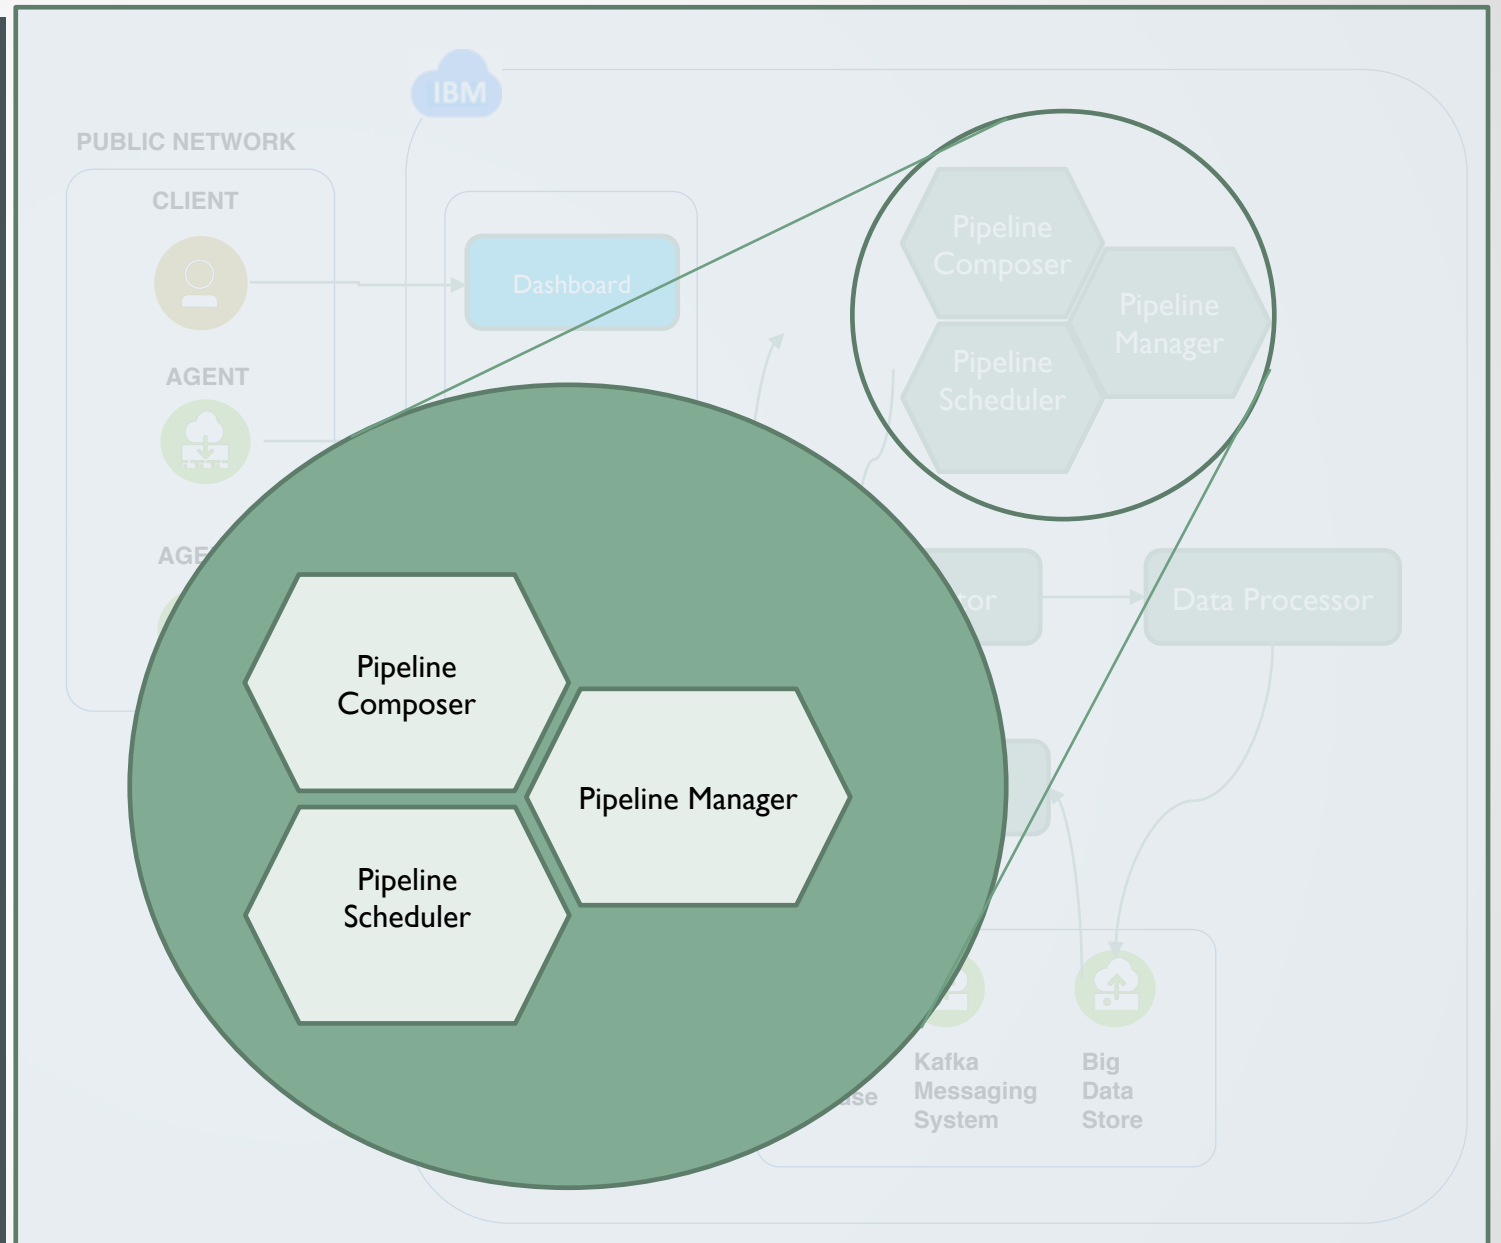

# CLOUD ARCHITECTURE

# MONOLITH ...REPLACED WITH MICROSERVICE

# CHARACTERISTICS OF MICROSERVICES

## CAPABILITIES DELIVERED IN SPRINTS

- 1. Pipeline Manager
- 2. Pipeline Composer
- 3. Pipeline Scheduler
- 4. Load Balancing and High Availability of each service
- 5. Scaling and Monitoring of each service

---

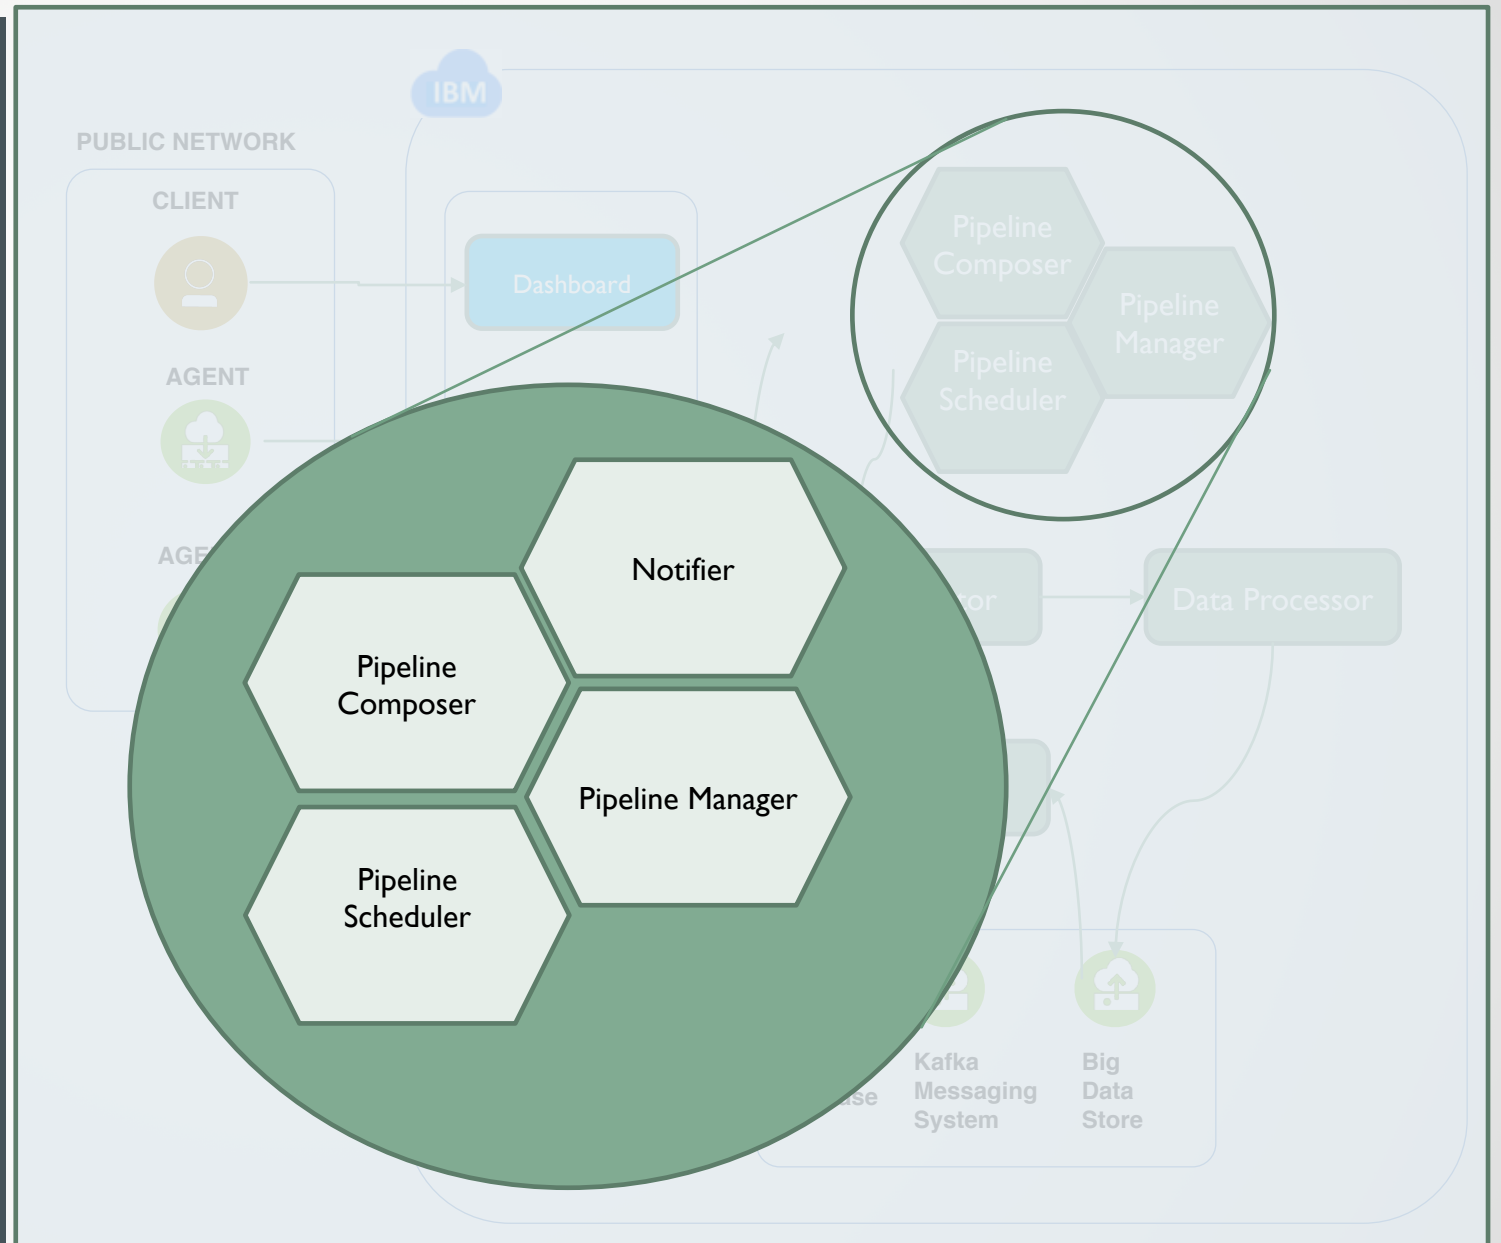

# HOLD ON ! FORGOT SOMETHING

- 6. Notification on Failures in the pipeline

Sprint  
6

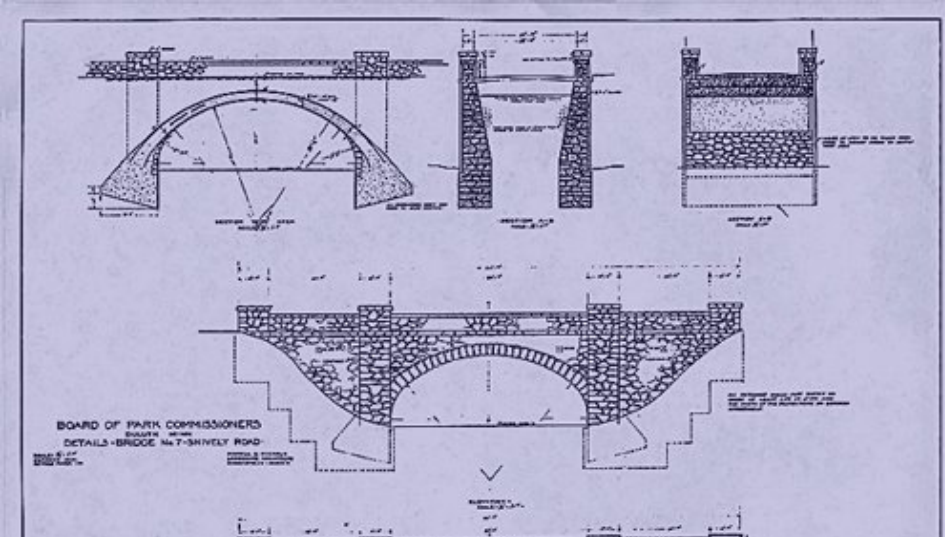

# THE NEW MICROSERVICE

# READ AND PRACTICE

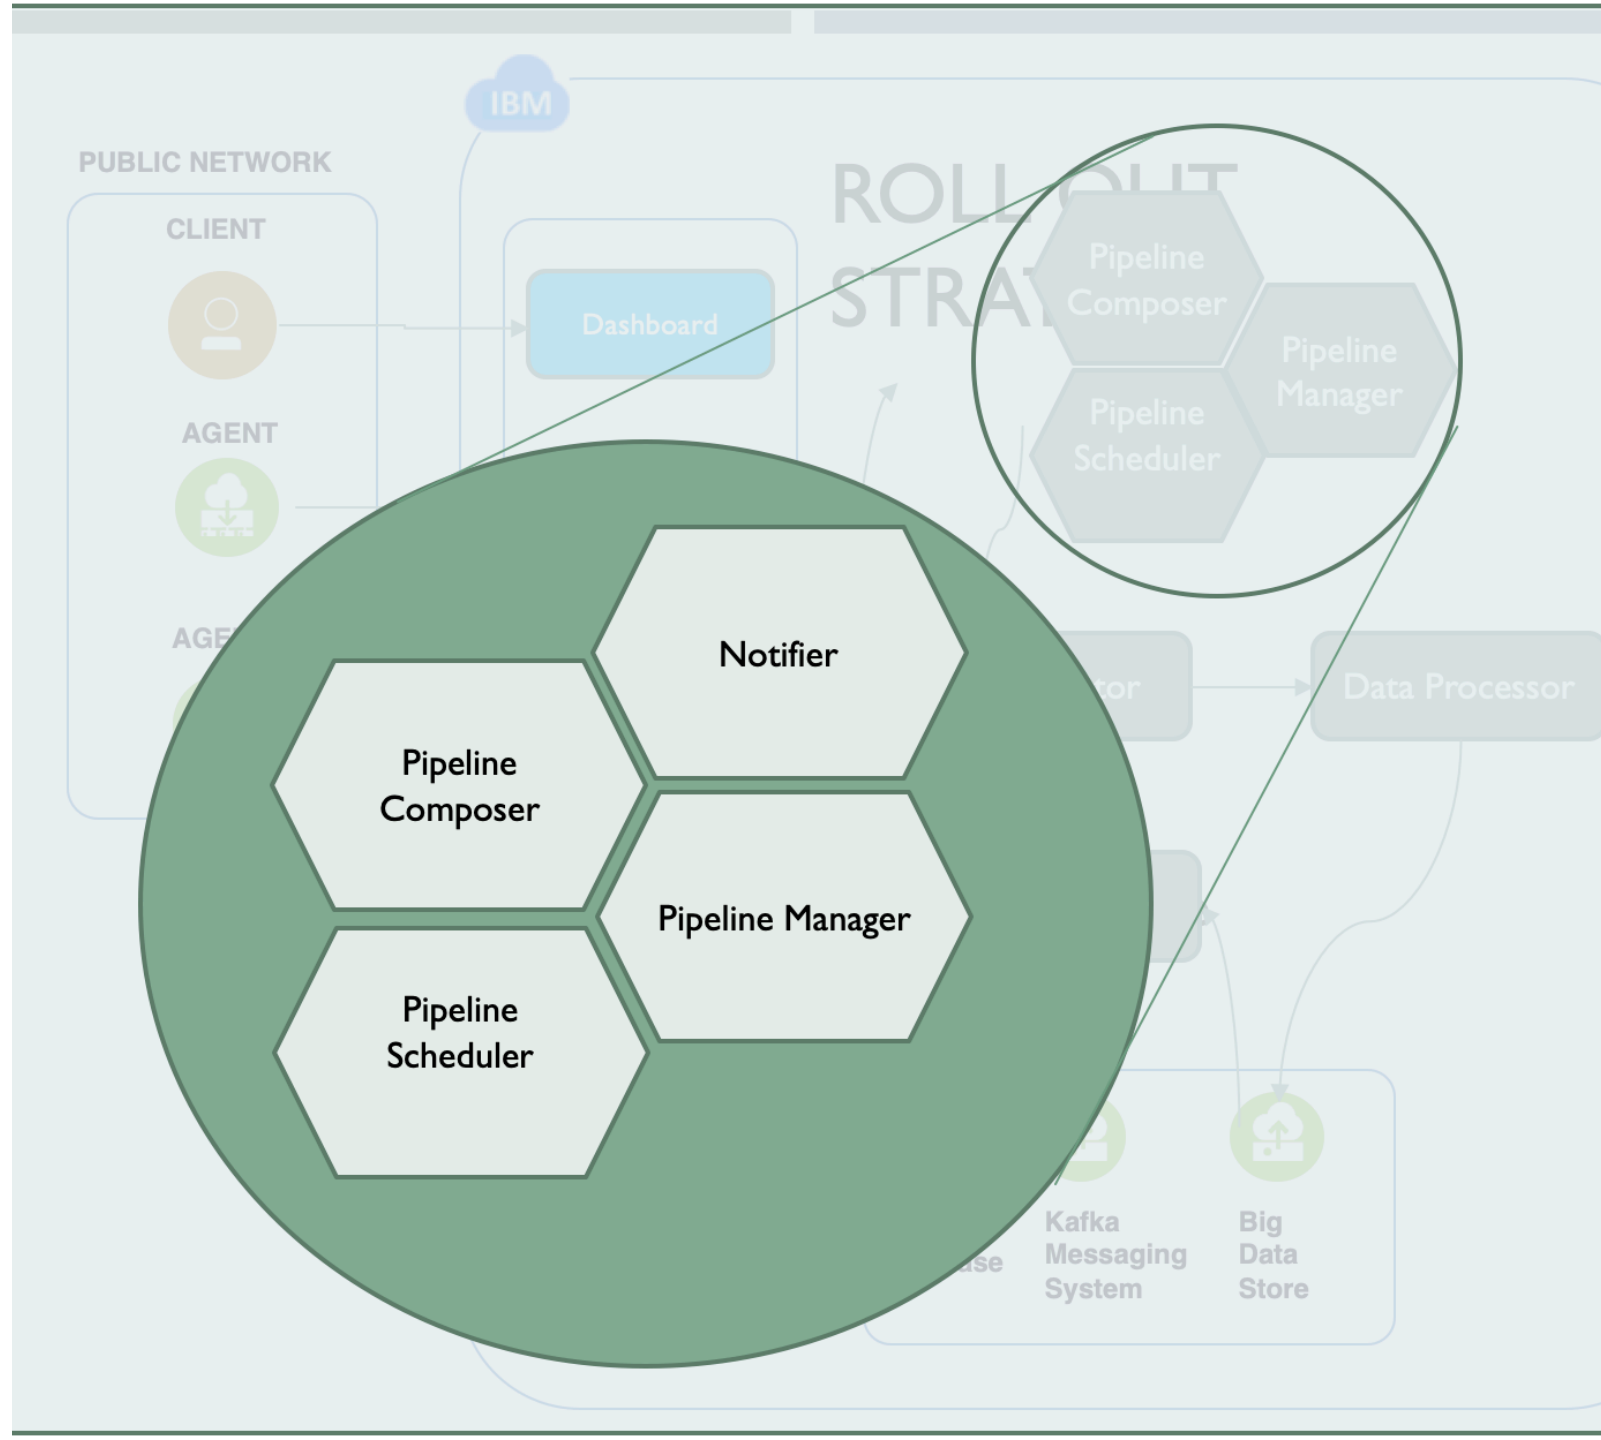

- Agile Software Development like construction projects

# START WITH A BLUE PRINT

■ Credits :  
<https://www.caroli.org/en/agile-bridge-analogy/>

# DELIVER FULL VALUE

■ Credits :  
<https://www.caroli.org/en/agile-bridge-analogy/>

## BRIDGE GETS STRONGER

- Feature Switches
- Traffic Throttles

<https://www.caroli.org/en/agile-bridge-analogy/>

## NEXT PHASES

- Increase Robustness of Notification Service
- User Interface for Pipeline orchestrator
- Audit of the pipeline to check for anomalies and data quality

## KEY TAKEAWAYS

Implement	Implement Safely
Automate	Automate early and often using continuous integration
Use	Use feature switches and traffic throttles
Encourage	Encourage separation and independence while maintaining communication

---
